150 ans du tableau périodique de Mendeleïev

1600 collégiens de l'académie de Toulouse
créent une œuvre d'art chimique

Le tableau périodique des éléments

Numéro atomique Masse atomique

26 56

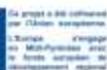

Symbole chimique

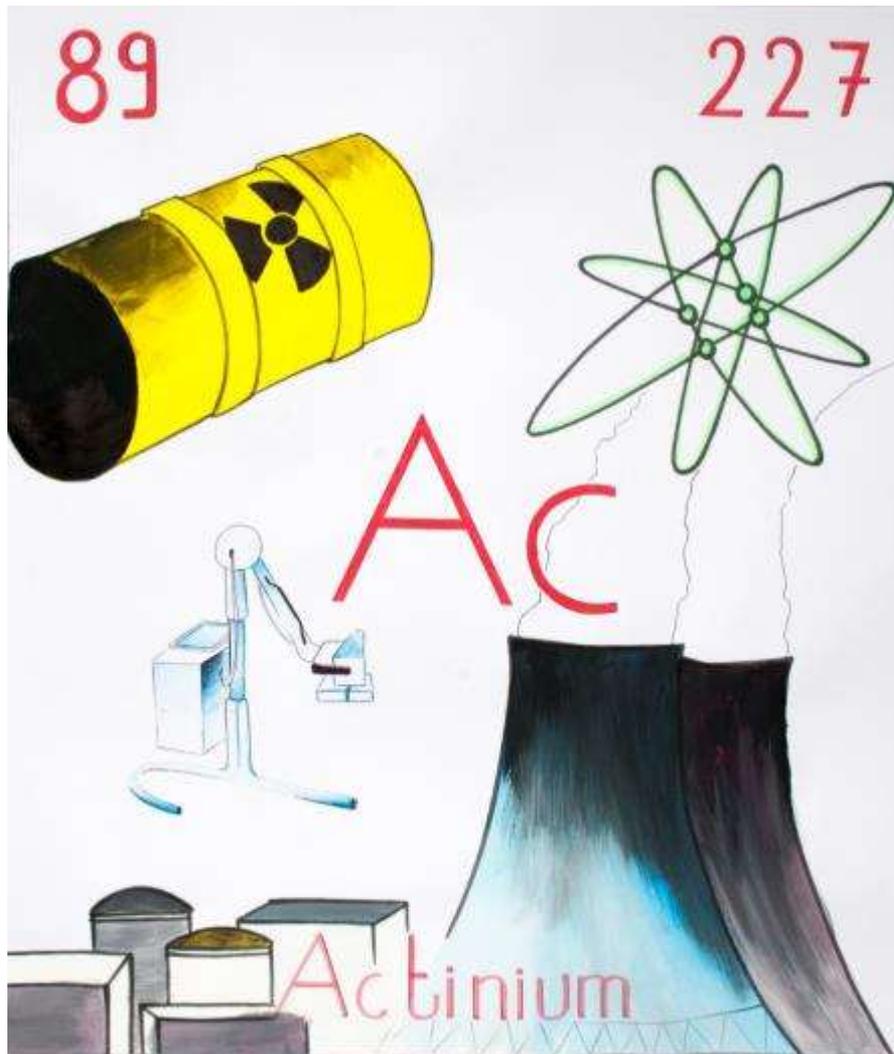

Fe

Nom de l'élément

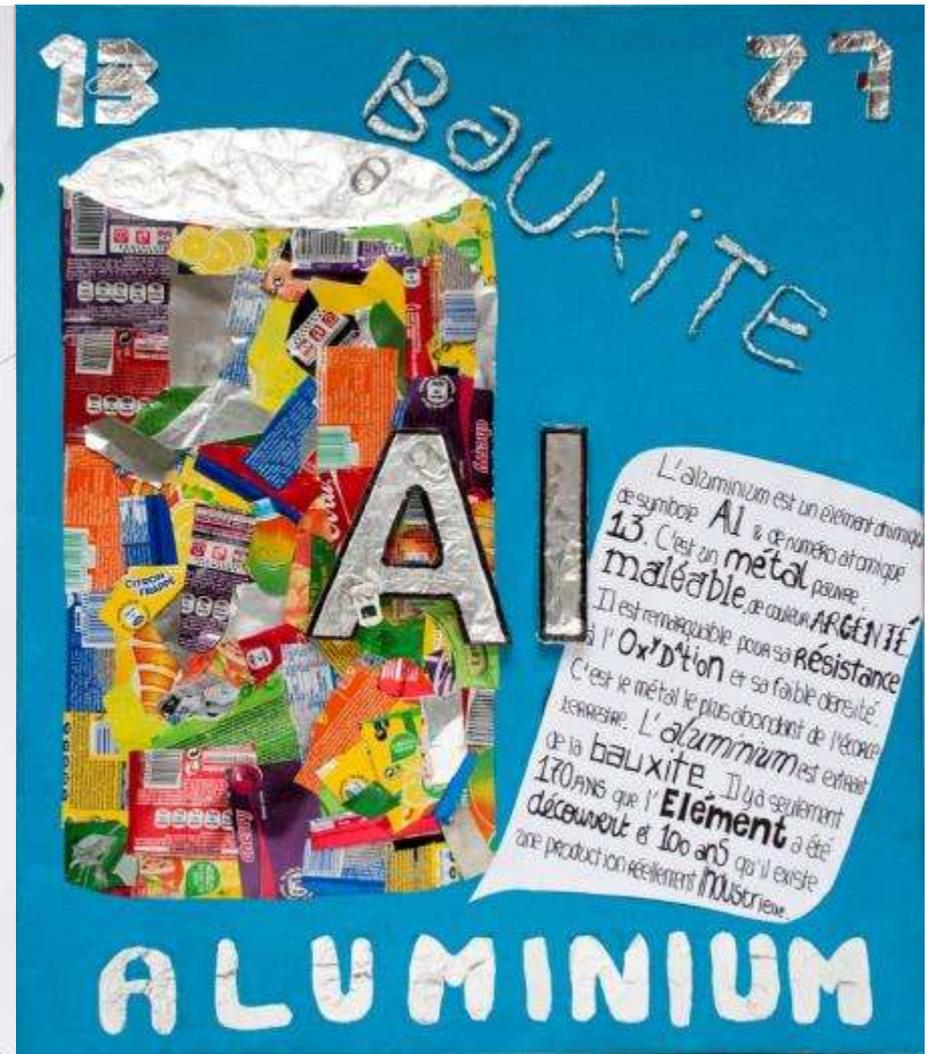

Fer

Avec

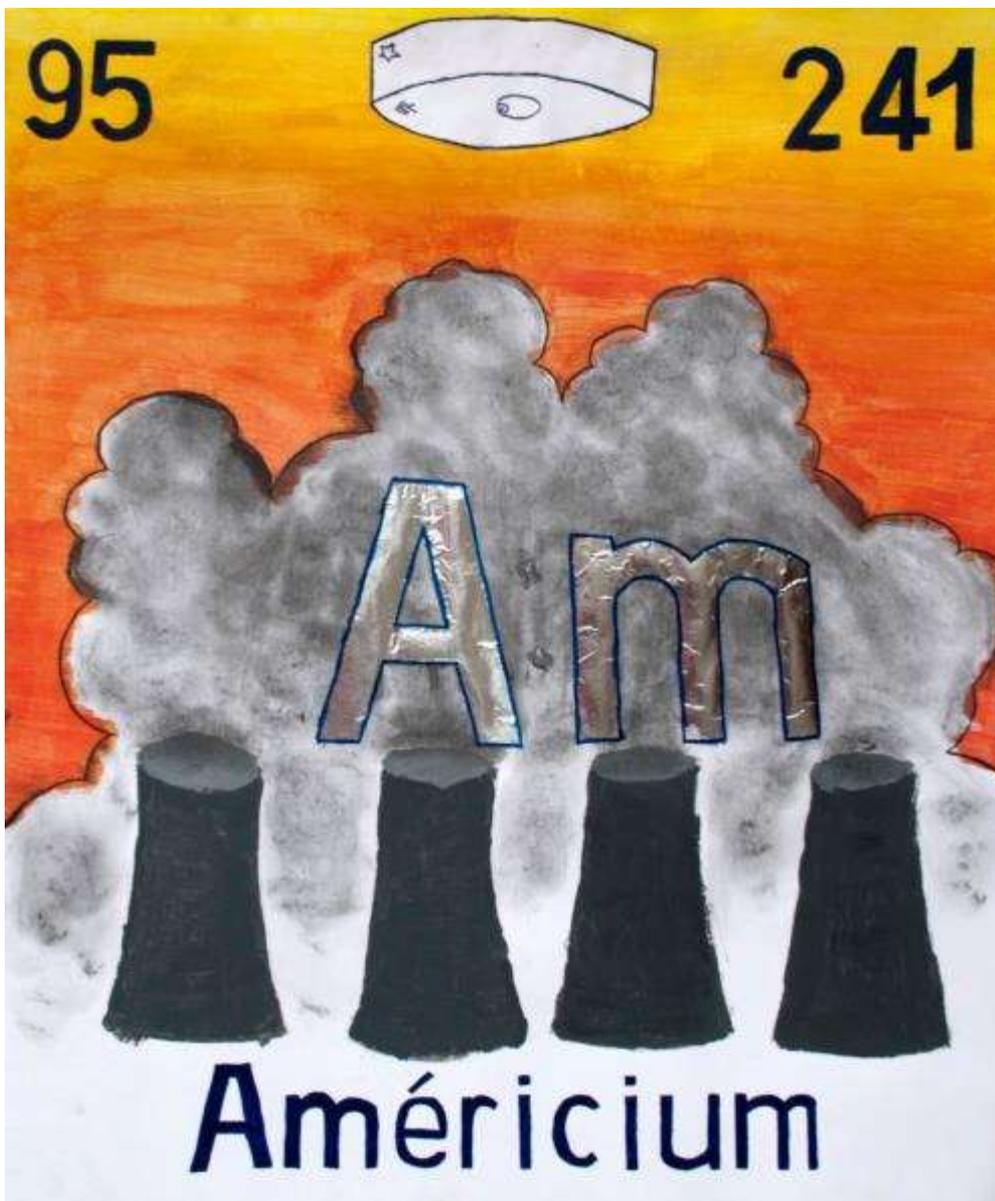

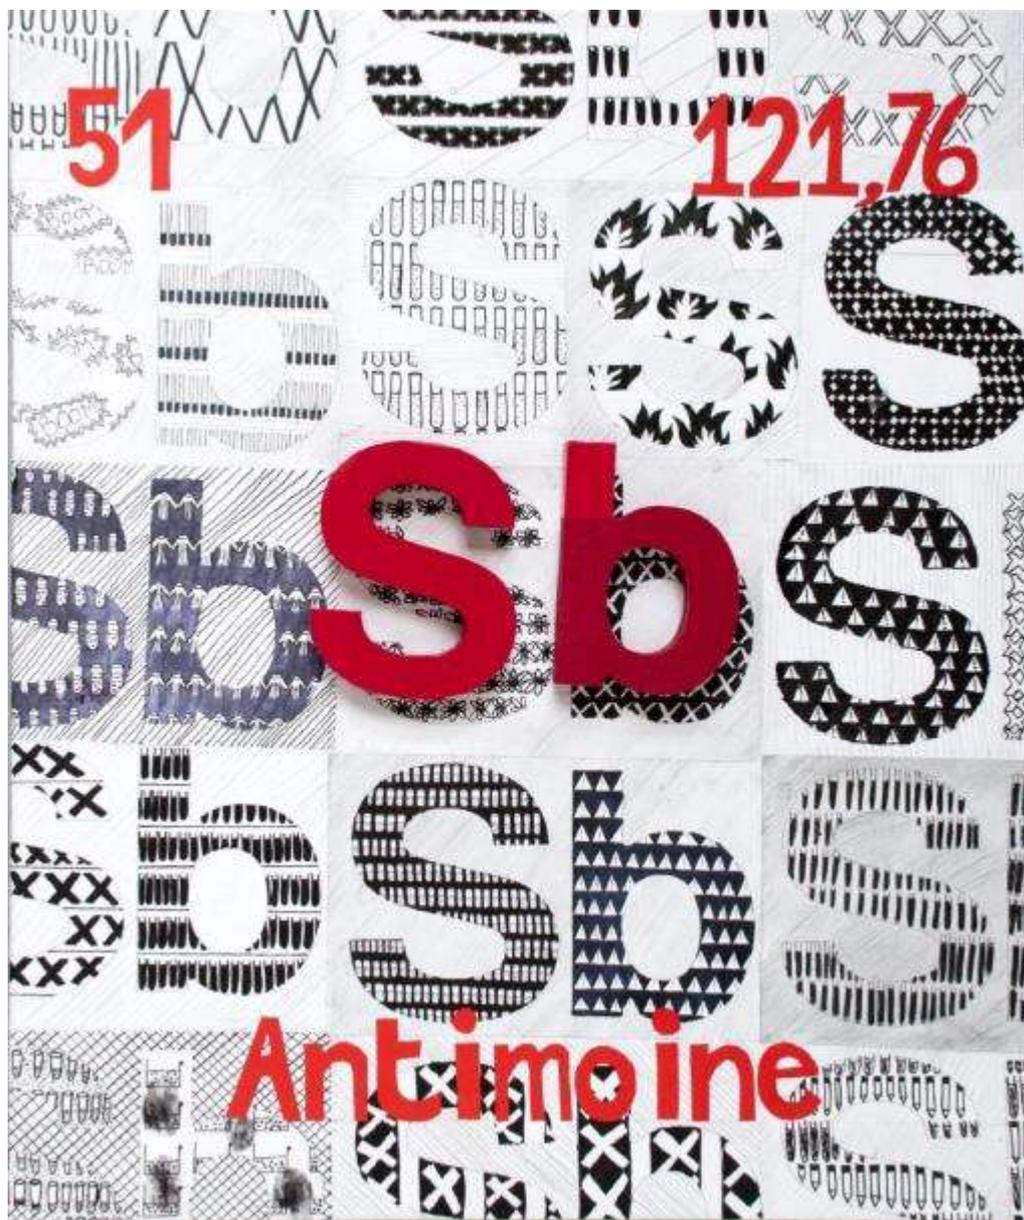

Assez ! c'est un acte ignoble !

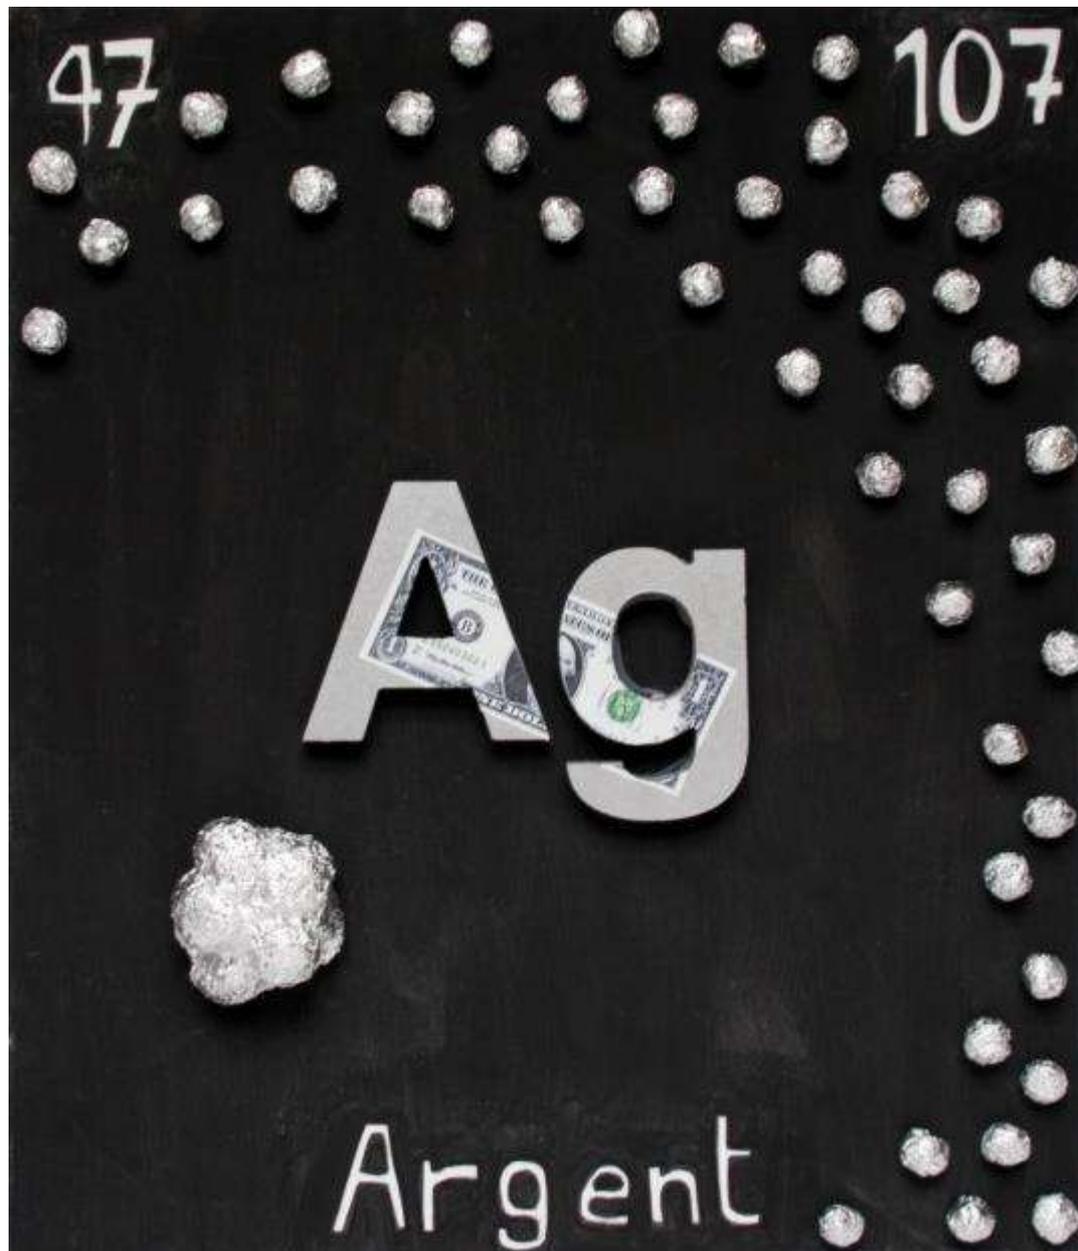

c'est à elle !!! c'est l'hallu quand-même ?!

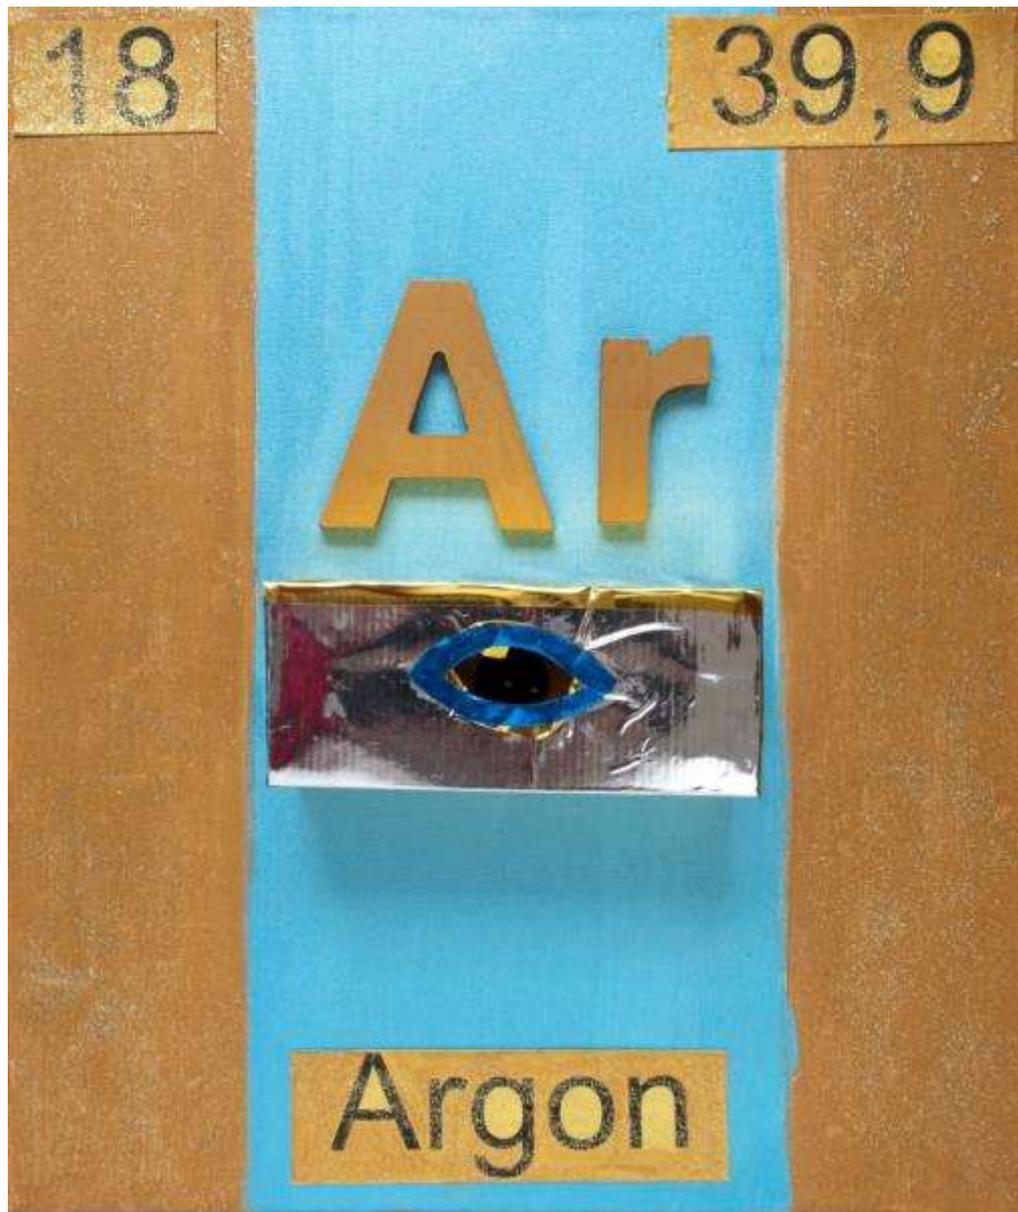

A aime amerrir ici

Est-ce Bé qui nous lance de la poudre d'antimoine aux yeux ?

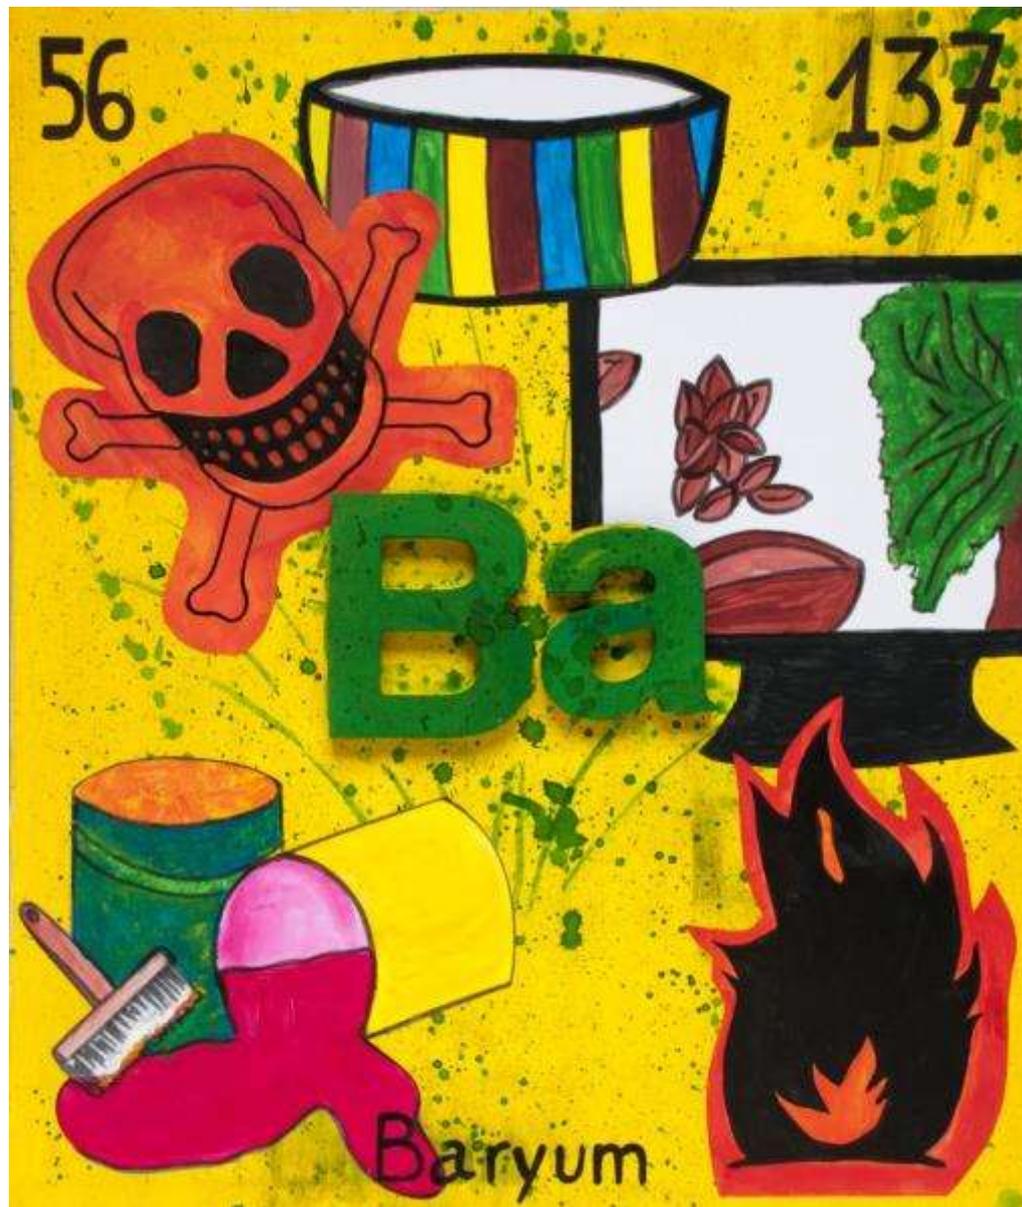

Non, trop âgée, désargentée

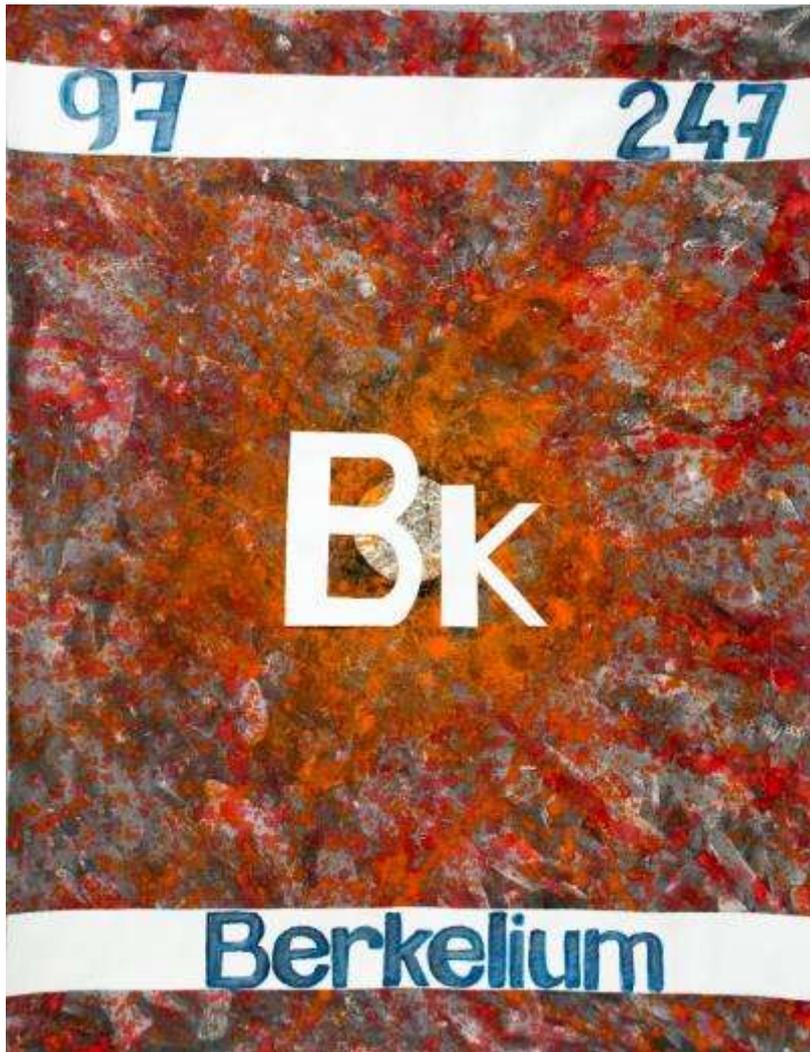

Ah bon ?

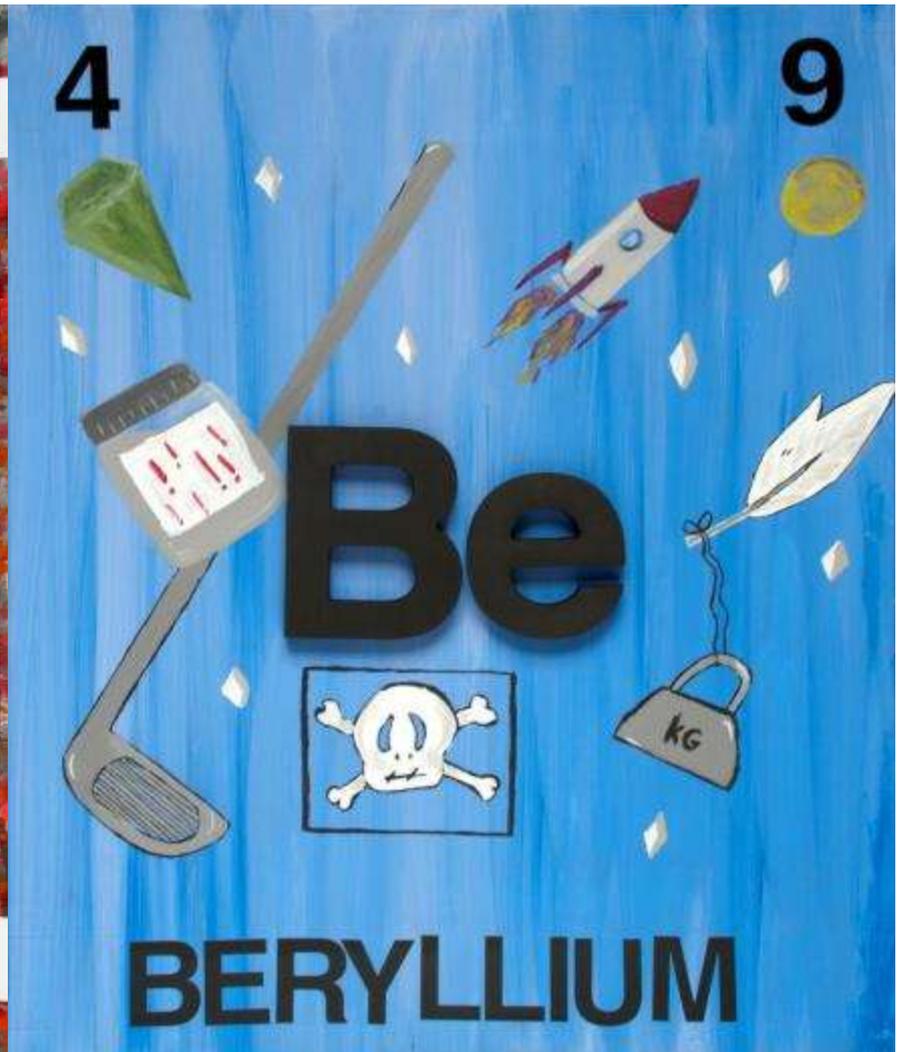

Genre Arsenic et vieilles dentelles... regarde elle s'tâte les poches... elle a la haine, et elle zozote

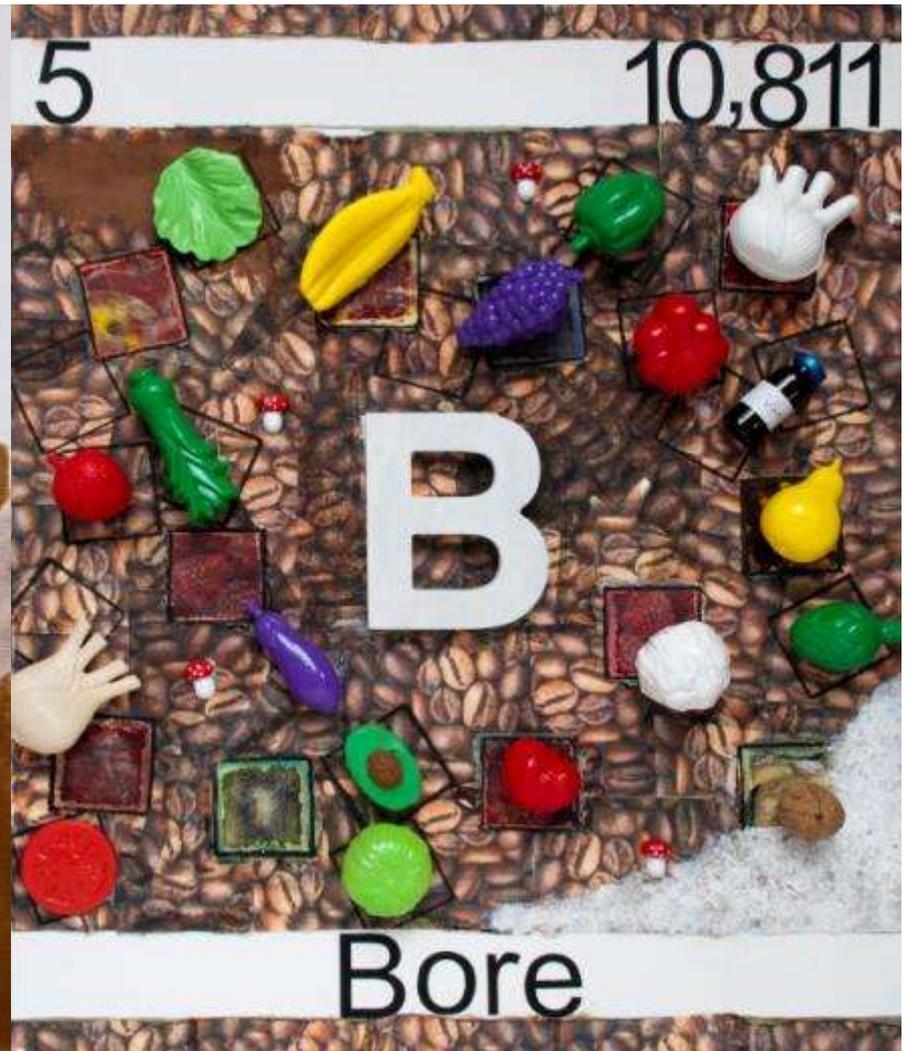

Bon ! Bary fera sa B-A d'homme

Bêrk regarde-le sur sa bécane !

Il nous fait le délirium du Berry

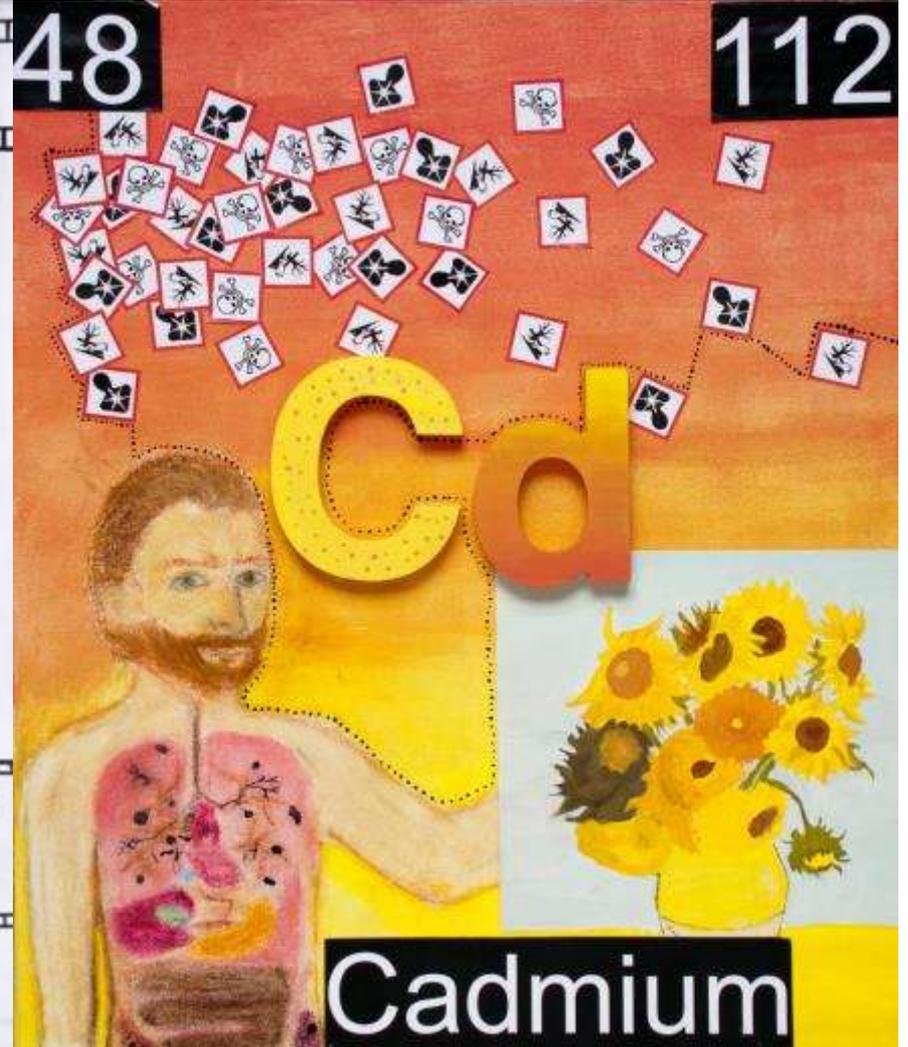

Bibi,

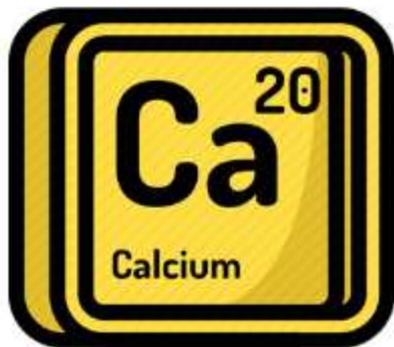

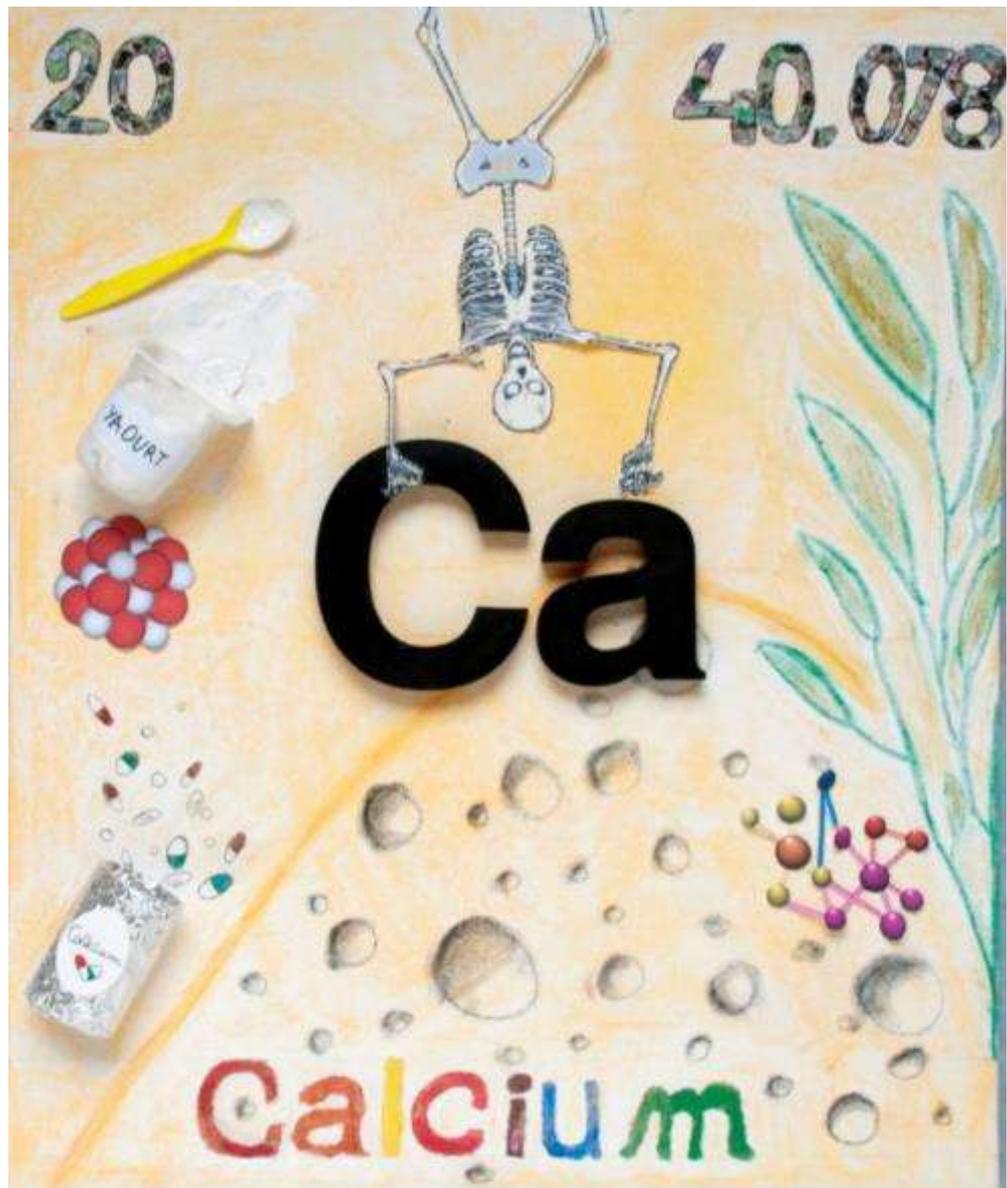

Bâche bébé par-dessus bord

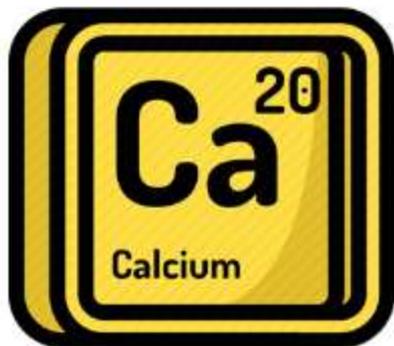

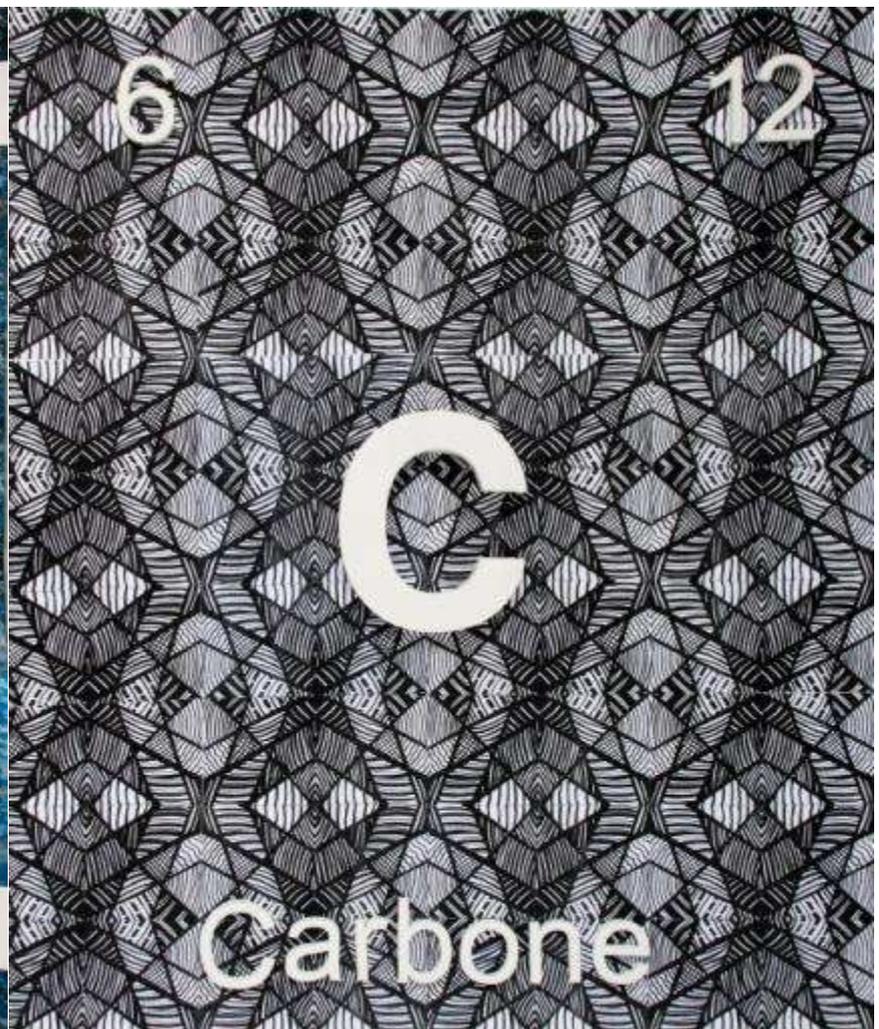

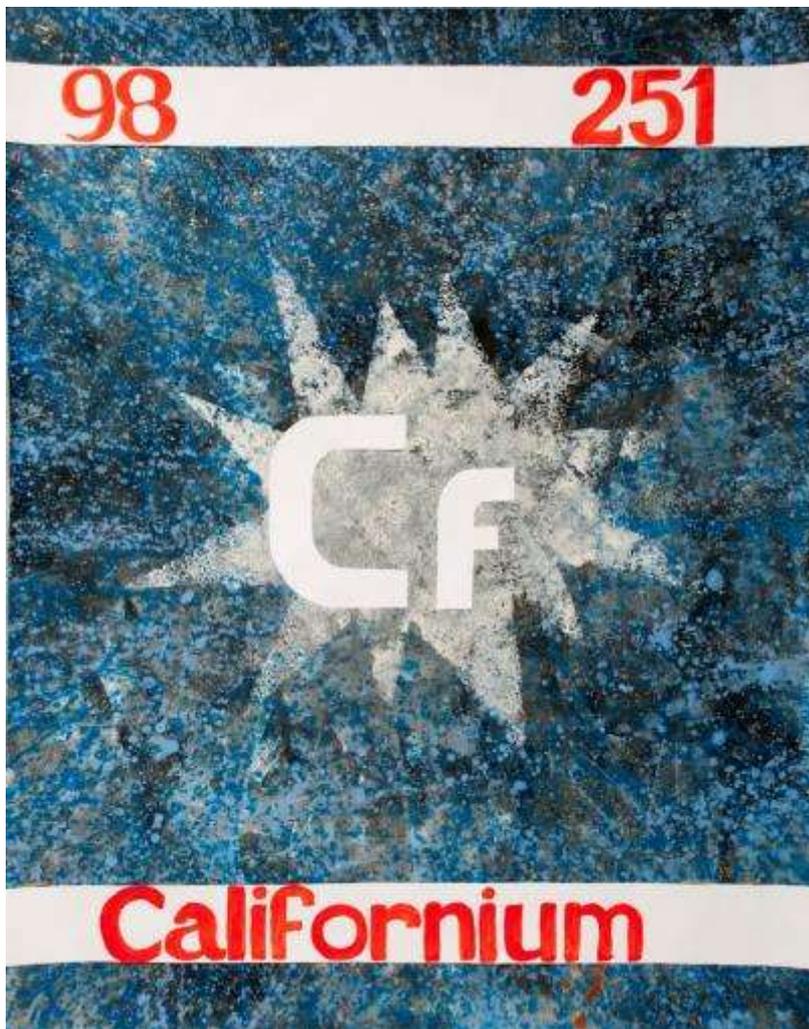

Brrr, quand on brome du noir,
il nous faut une bière ...

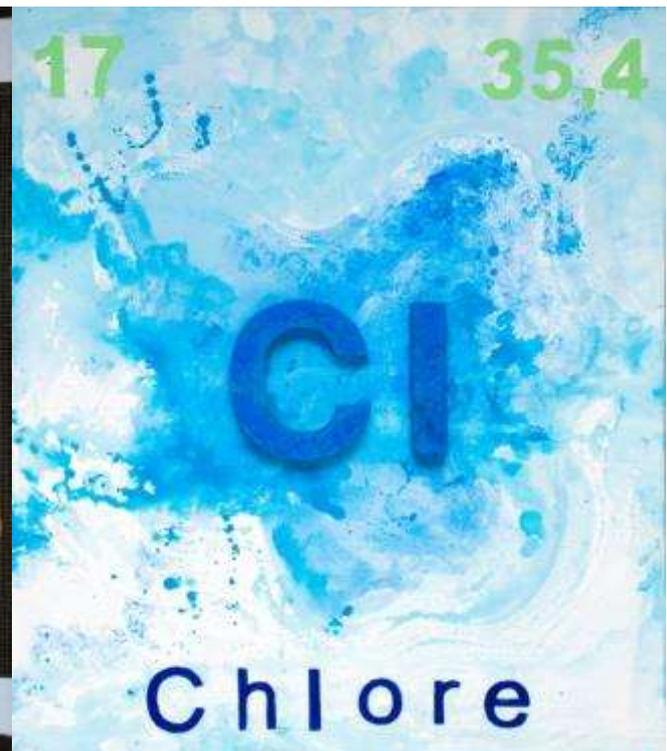

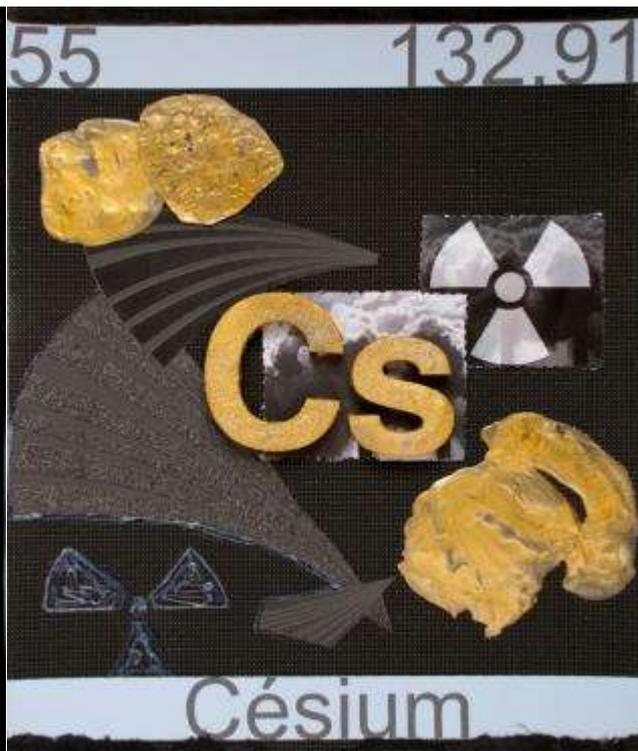

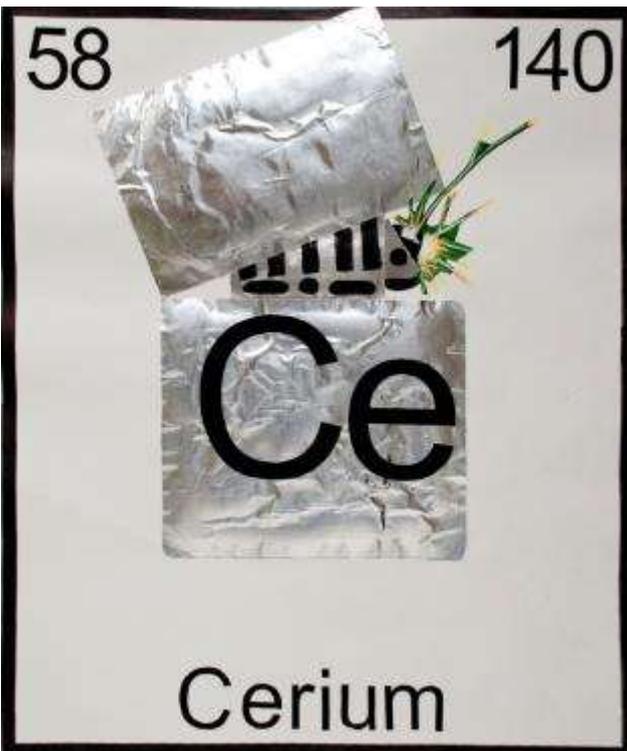

Il faut s'aider un peu, quoi... quoi d'mieux !

C'est à qui ça ?

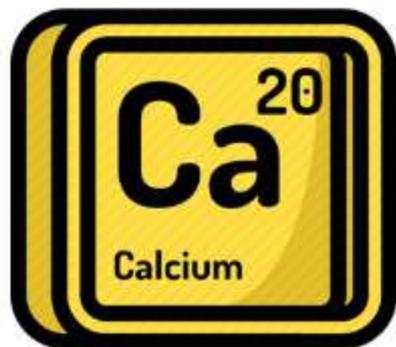

C'est au calif en pleine californication dans le car pour Narbonne

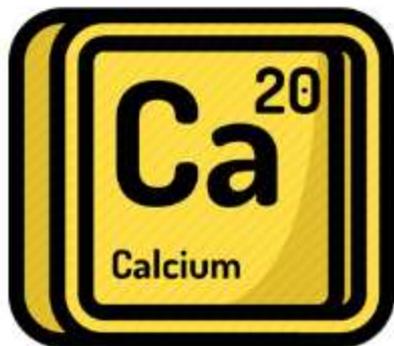

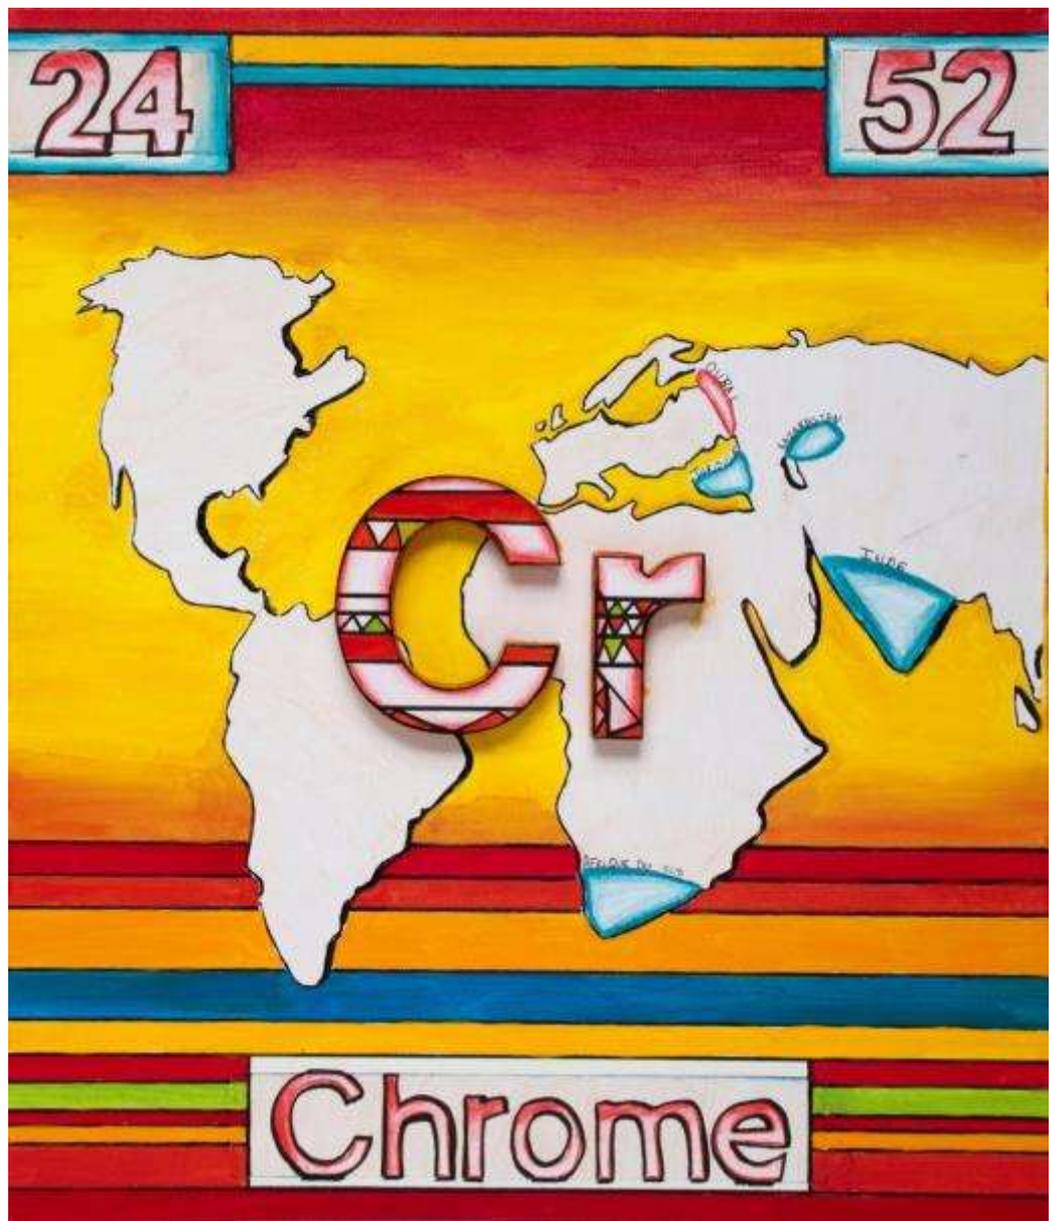

Sérieux ?!

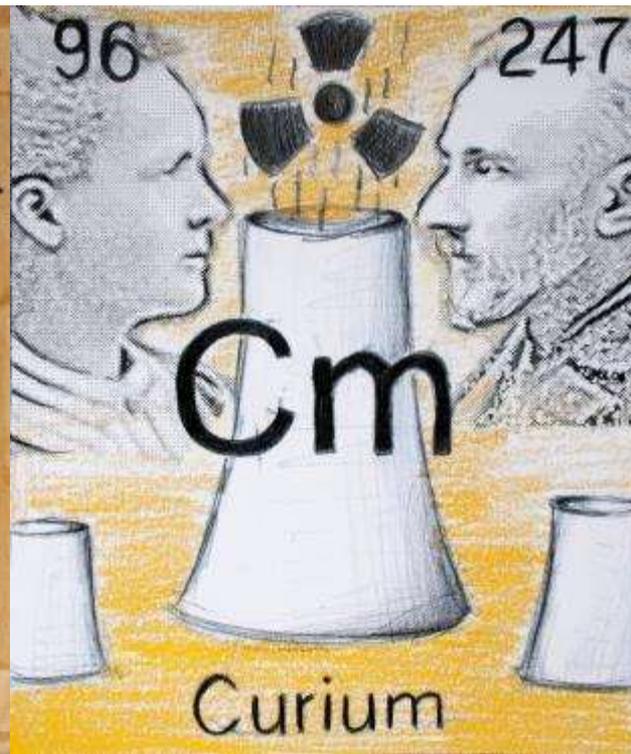

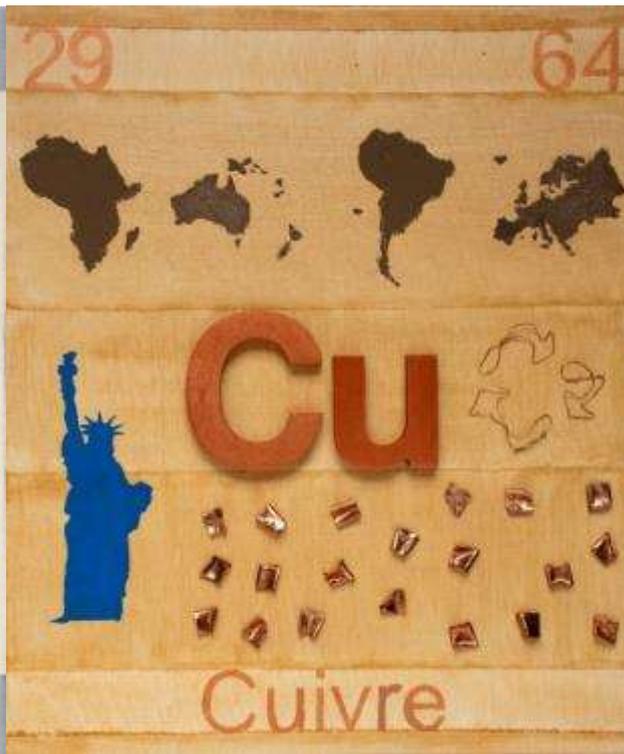

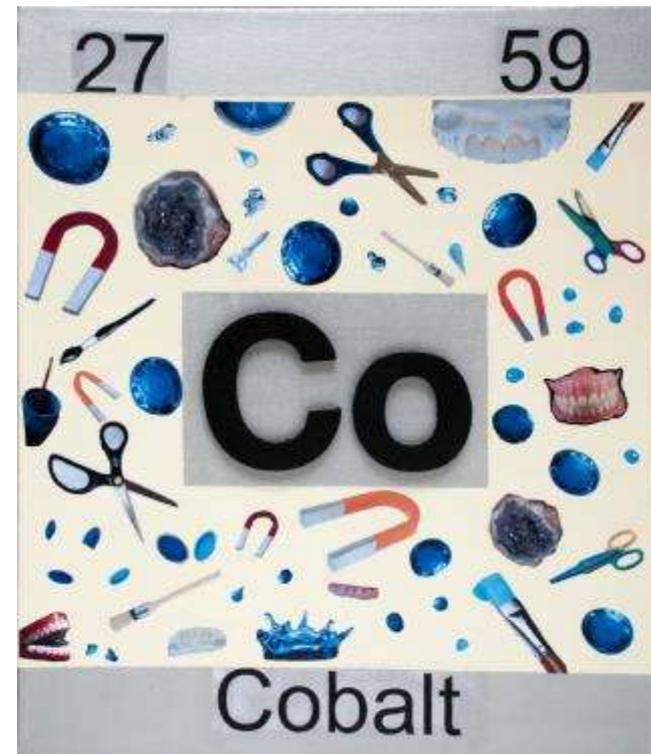

il faut saisir ces hommes, qu'ils cessent !

Il faut clore l'épisode !

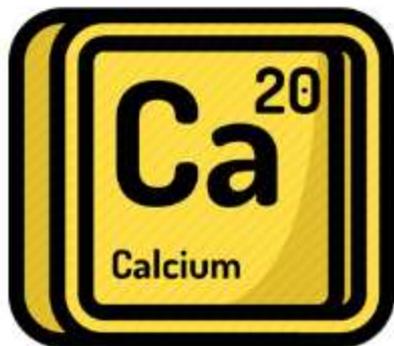

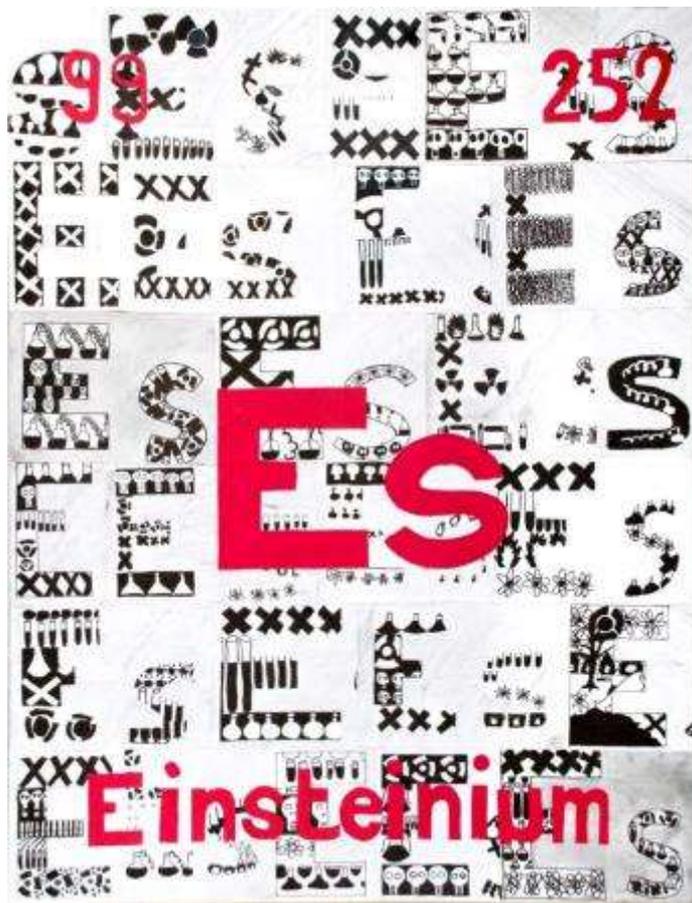

Ça ne sert à rien, bande de Cro-Magnon !

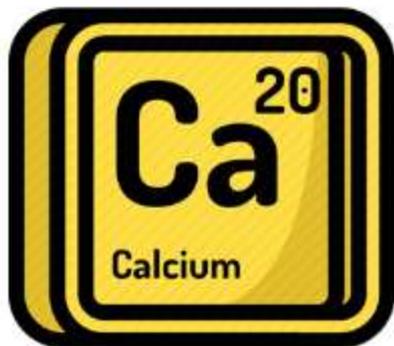

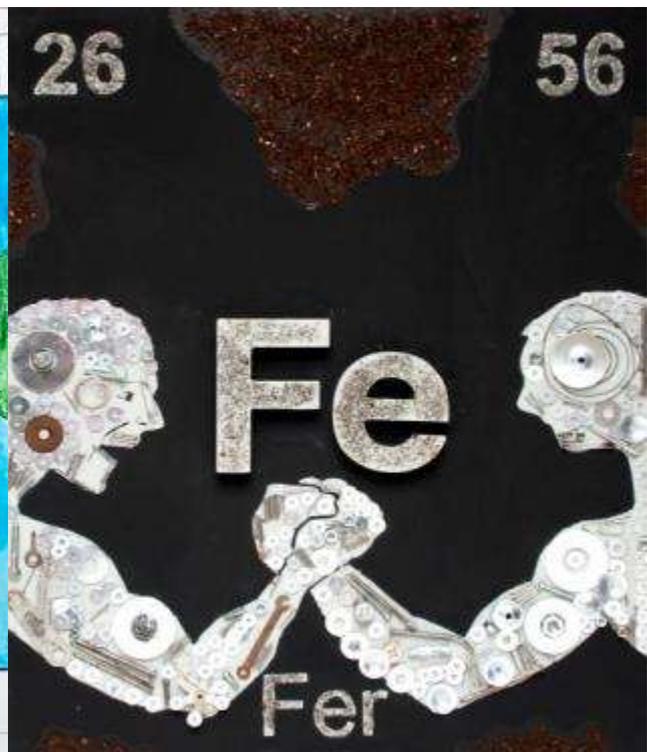

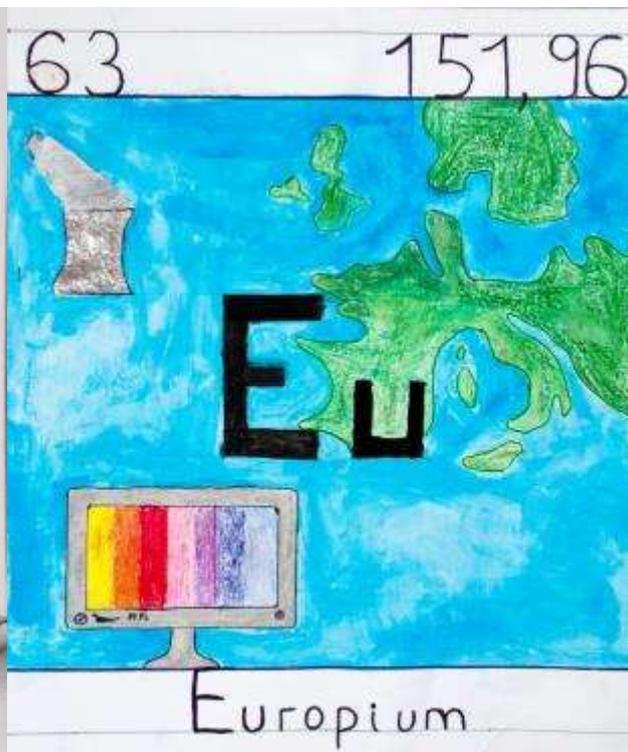

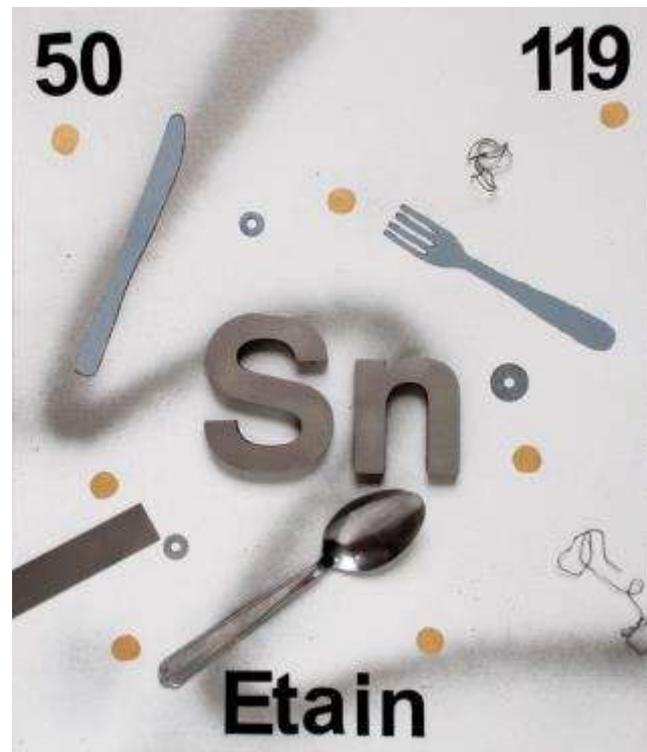

Oh non ces sots se cobaltent encore ! Ils sont ivres ces cul terreux. Quels hommes curieux !

Tiens, la Déesse a monté les Db au maximum, quel capharnaüm !
dis, euh... l'homme-là... c'est Einstein ? L'homme dans l'herbe, là ?

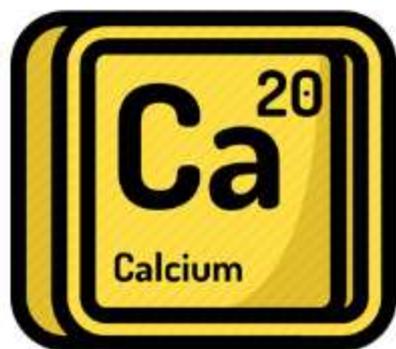

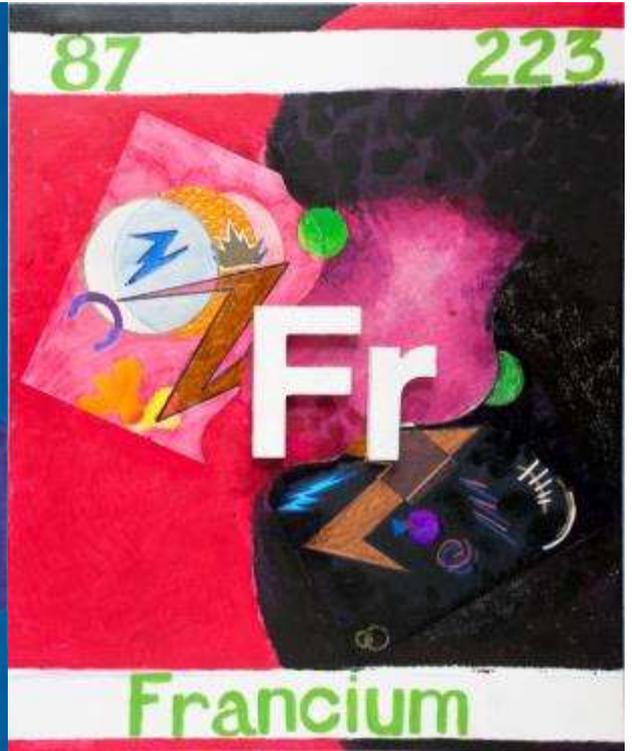

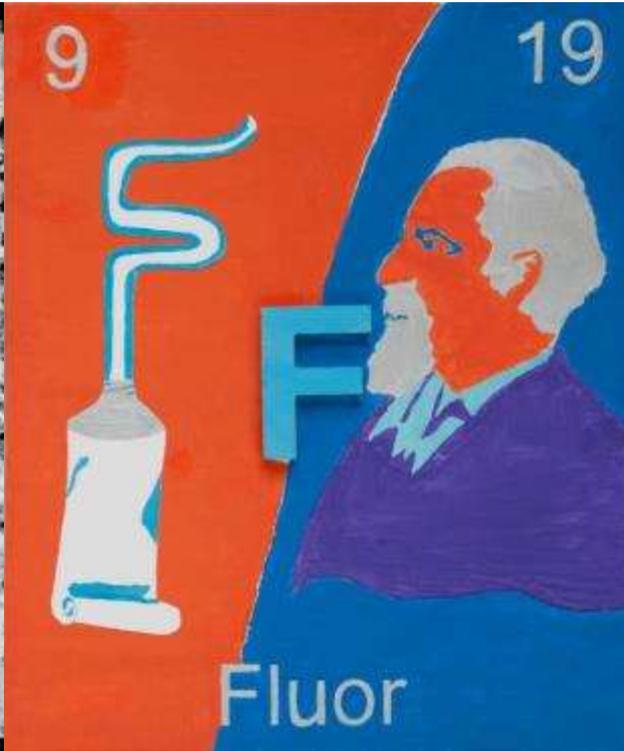

Chut ! Éteins,

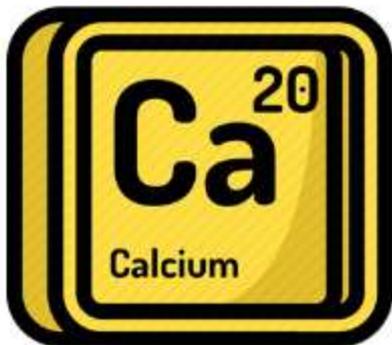

l'Europe est en feu !

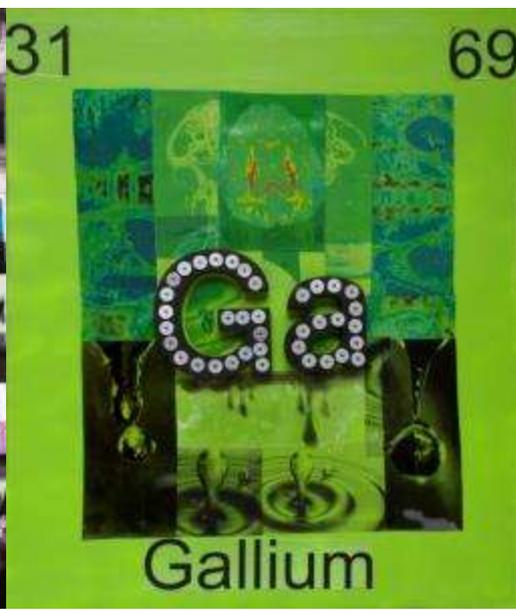

Que faire ?

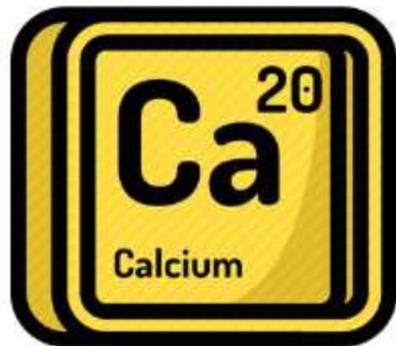

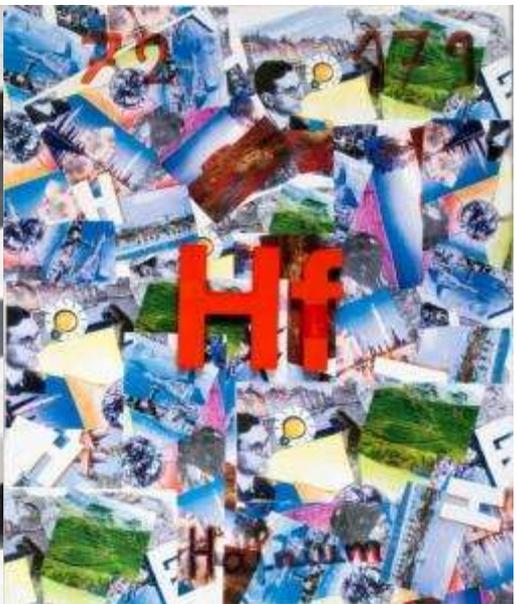

Écoute la FM et ferme-la nom d'un p'tit bonhomme, flute alors ! Mais ! même la France ?

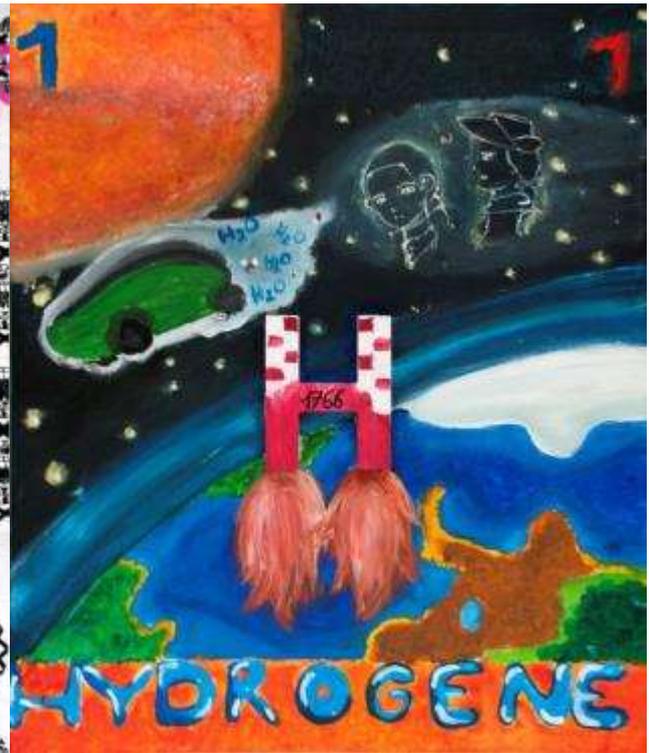

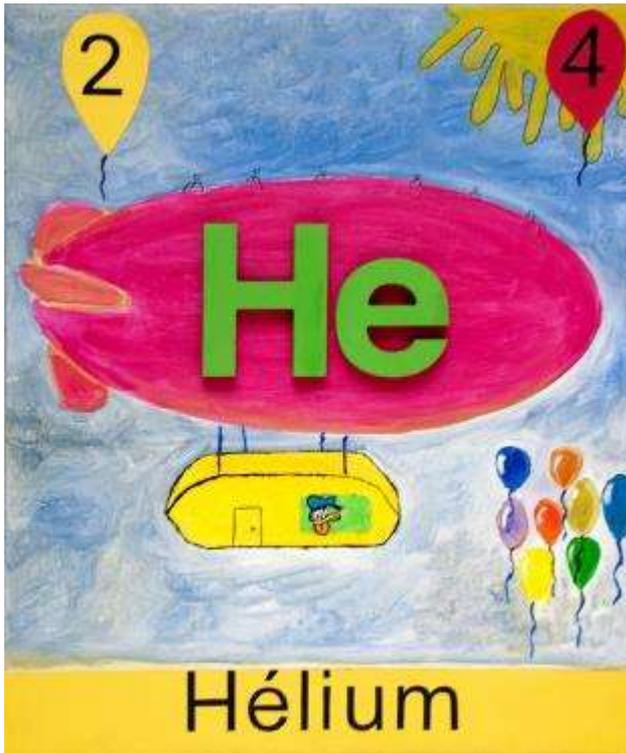

Oui, ça gadouille, les gars du pays de Galle ont la galle,

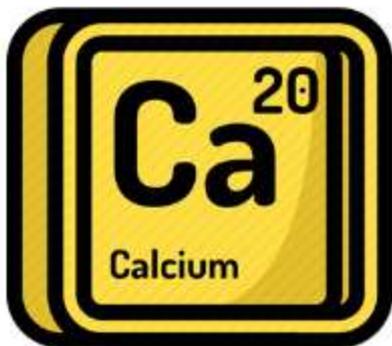

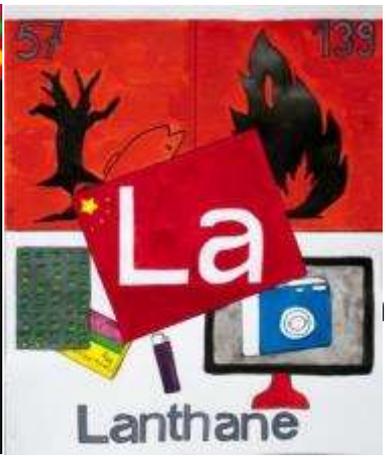

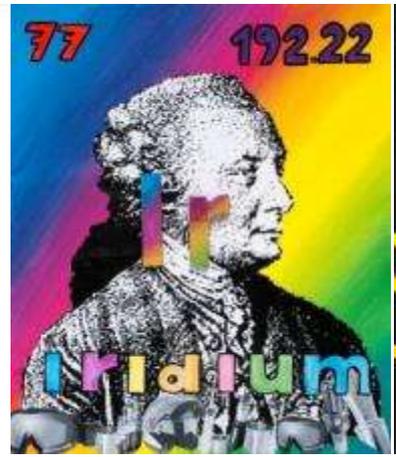

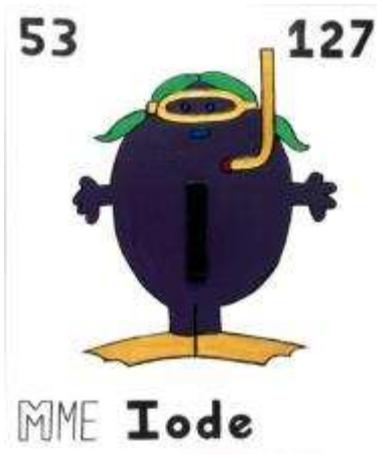

et mes cousins germains ont leur micro HF HS

Aïe, l'élite a chaud !

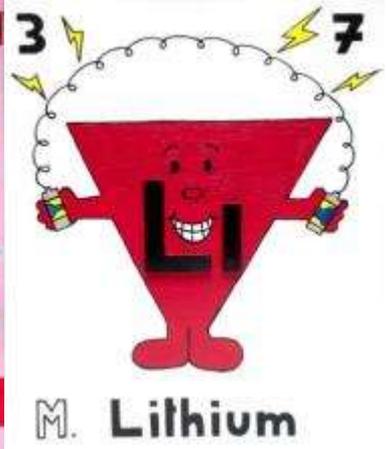

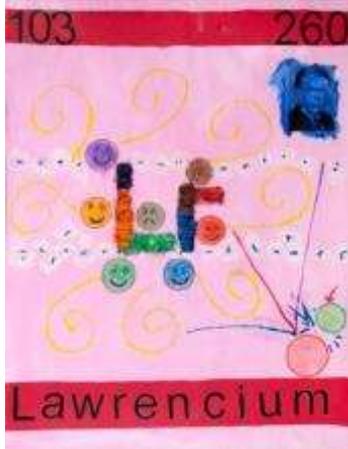

Si l'hydre gène, hachons-la !

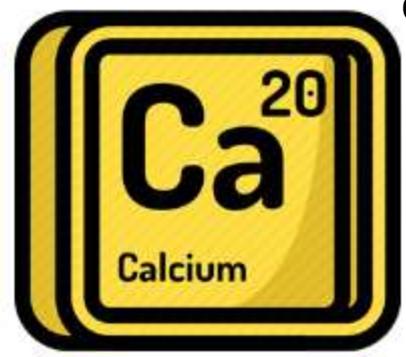

iane

C'est un coup de la hyène iodée : hier, elle a crypté l'antenne

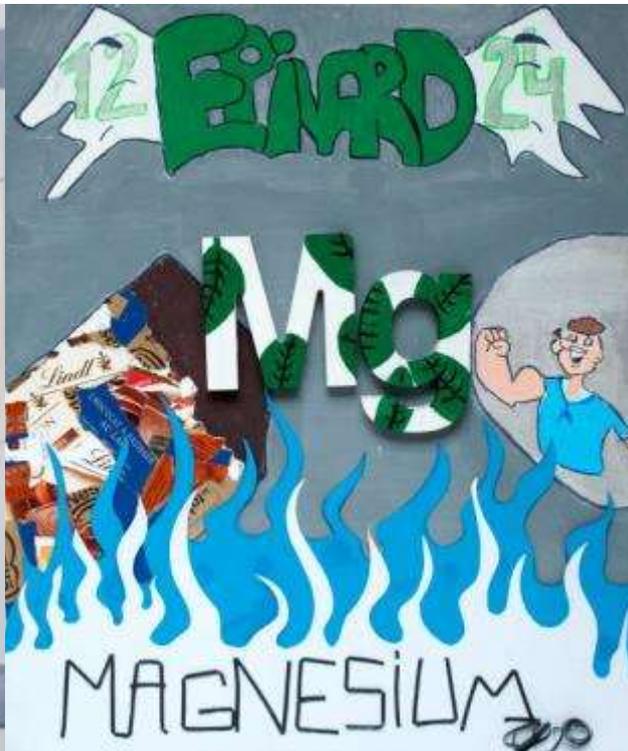

de Laurence sans bouger de sa litière !

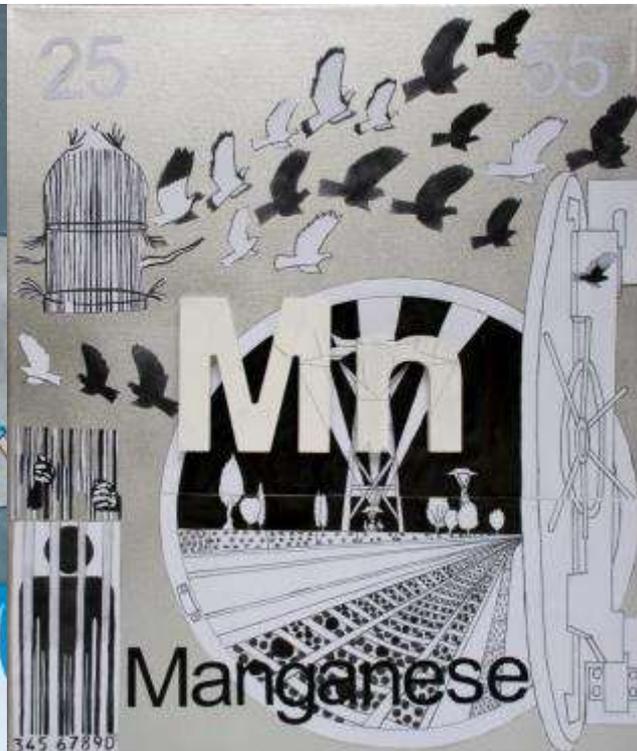

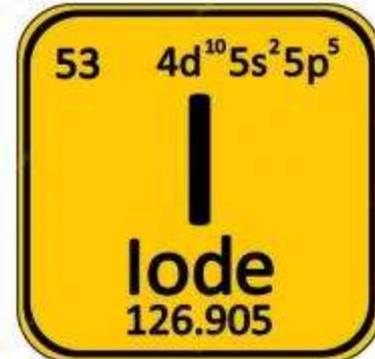

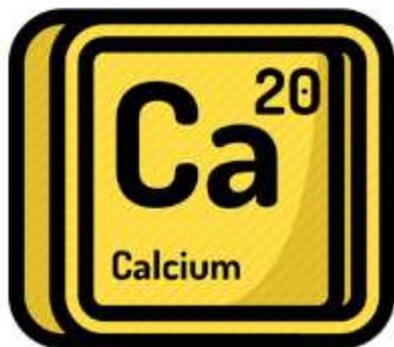

Où ? À Lutèce ?

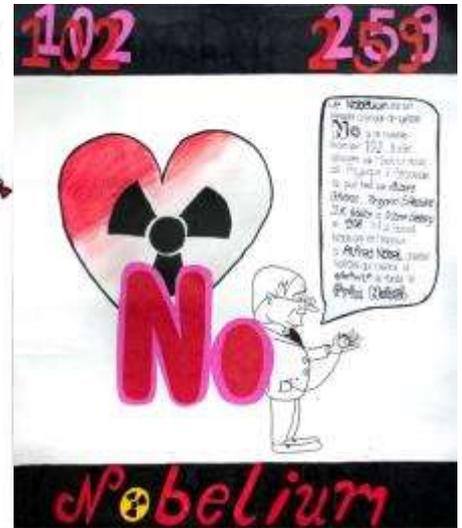

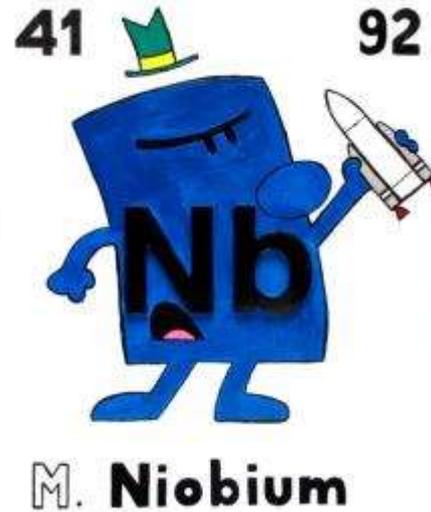

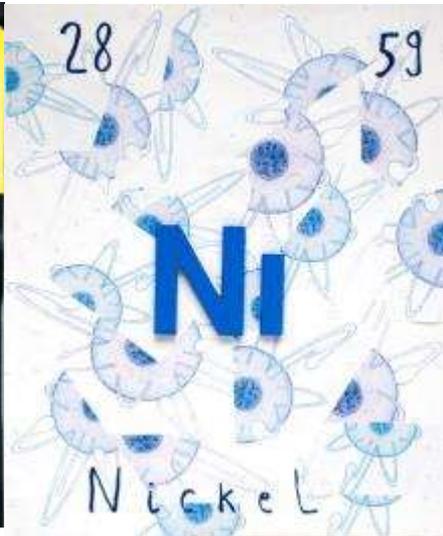

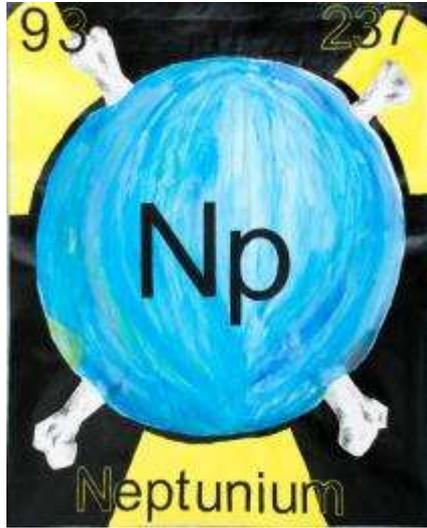

Allez, magnez-vous,

c'est toujours elle qui mène

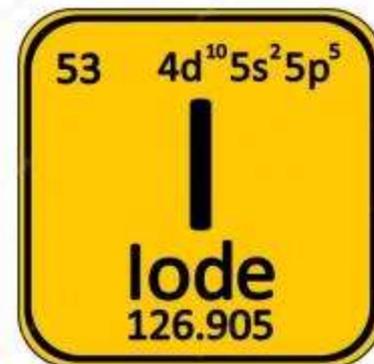

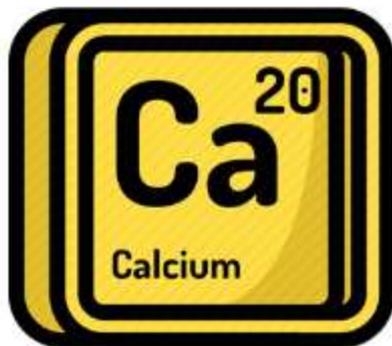

Neptune nique dans un nid nickel :

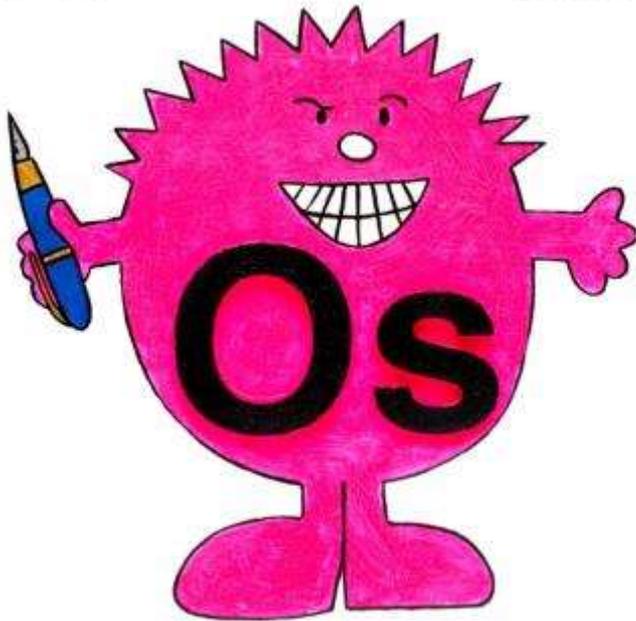

un nid d'opium !

c'est un prix Nobel ?

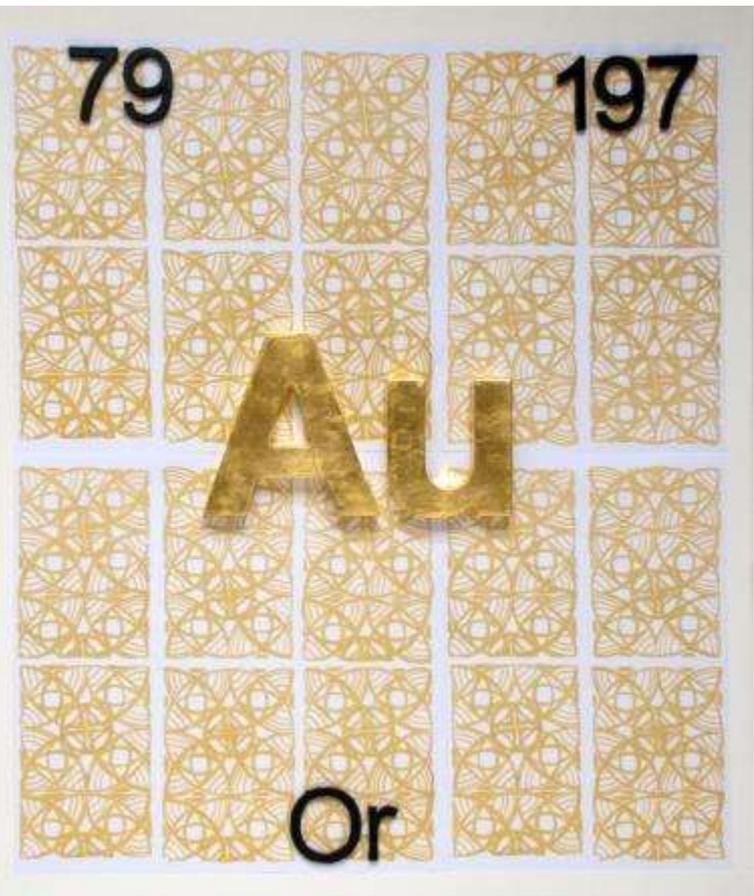

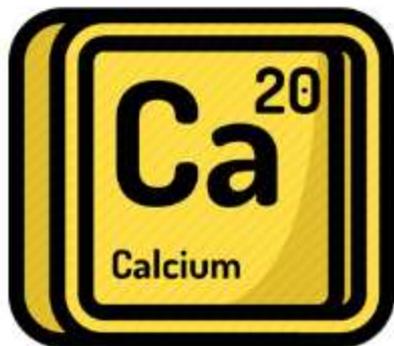

76

190

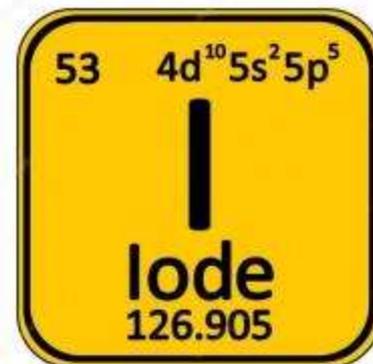

MME **Osmium**

C'est l'osmose,

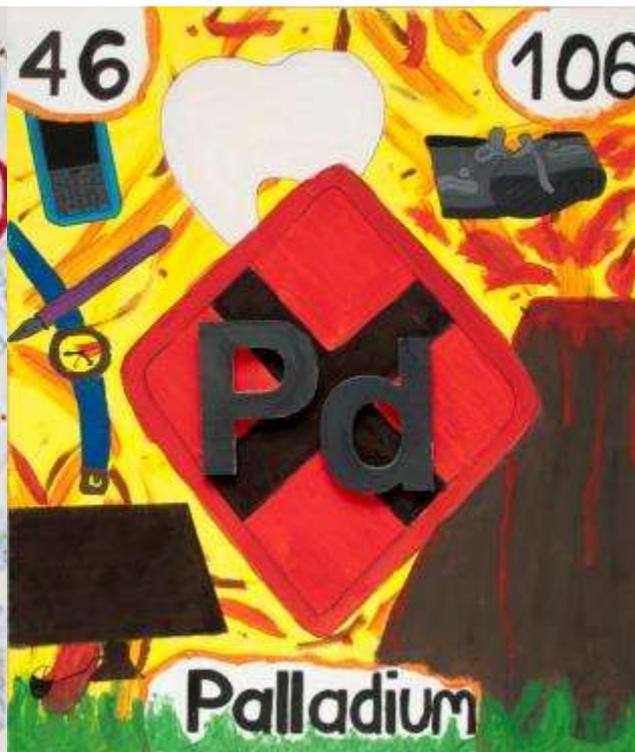

il s'endort ahuri

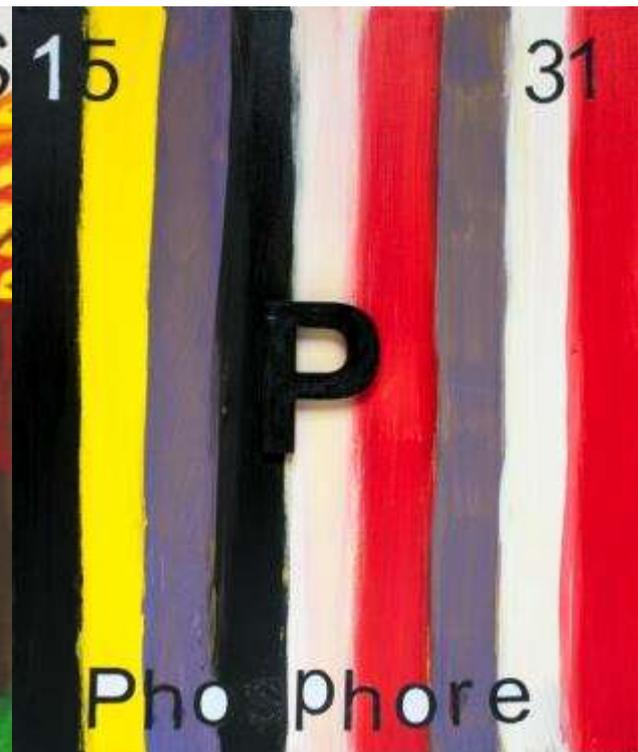

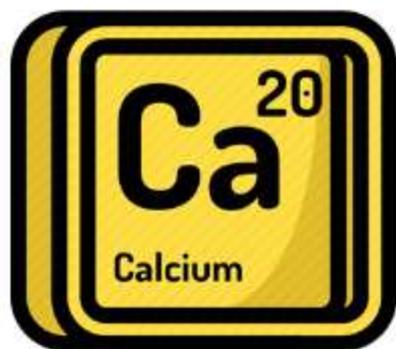

Aussi gêne-t-il

la ballade

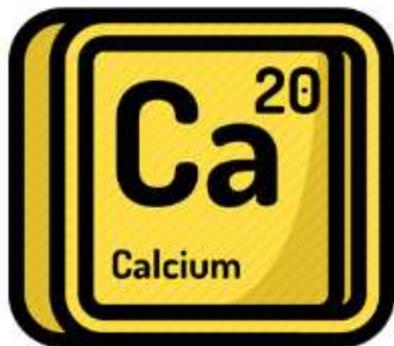

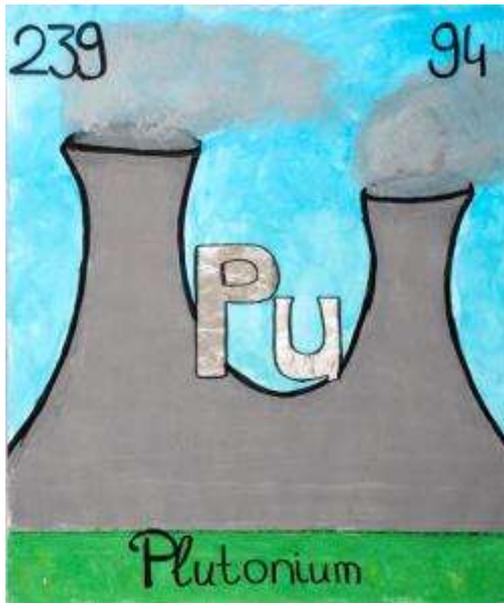

le long du Bosphore phosphorescent

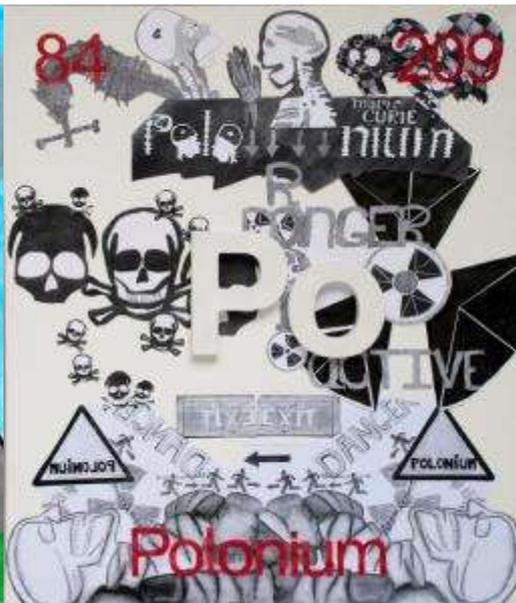

La blonde platine va péter les plombs, c'est le problème

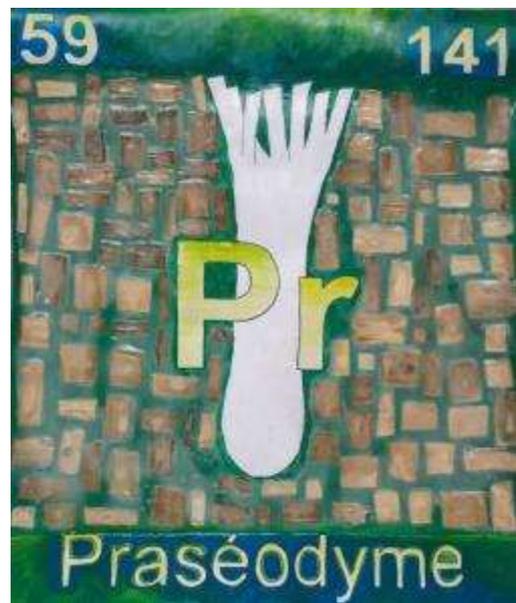

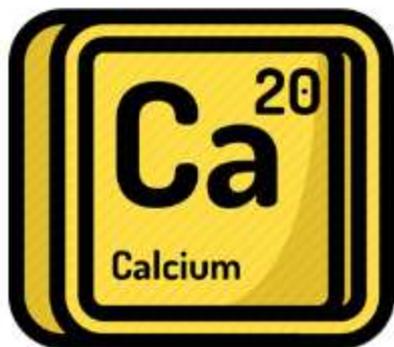

Mieux vaut plutôt

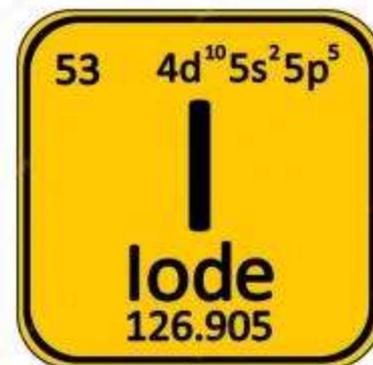

partir en Pologne,

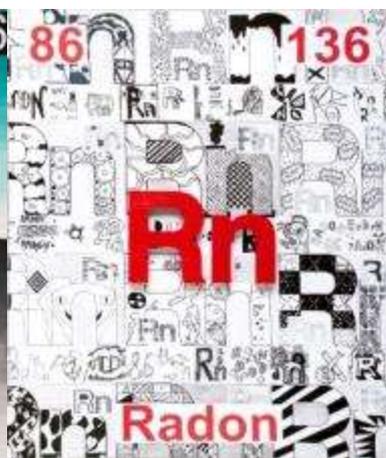

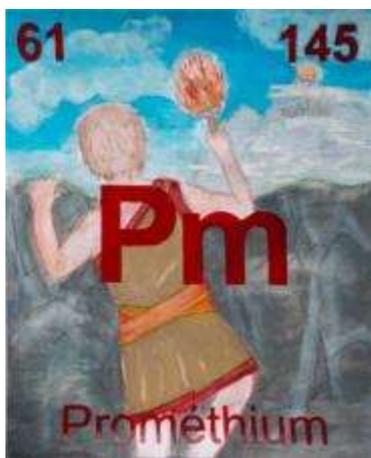

potasser

le phrasé maudit de nos pères

Promettez

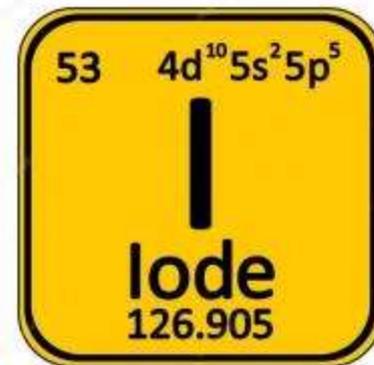

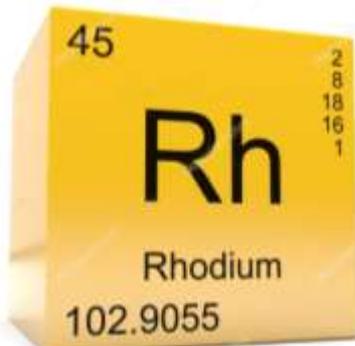

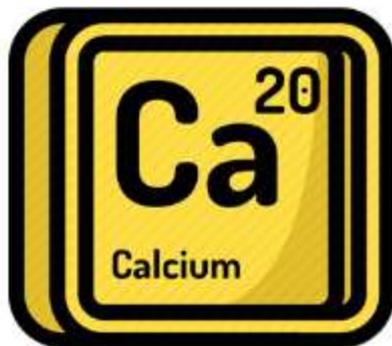

de ne pas irradier

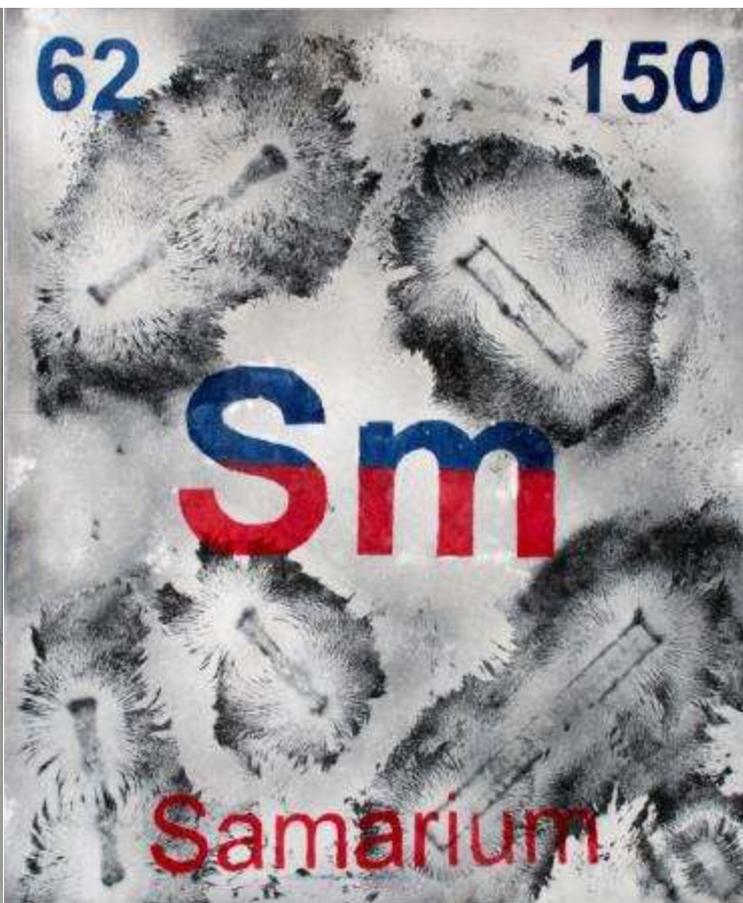

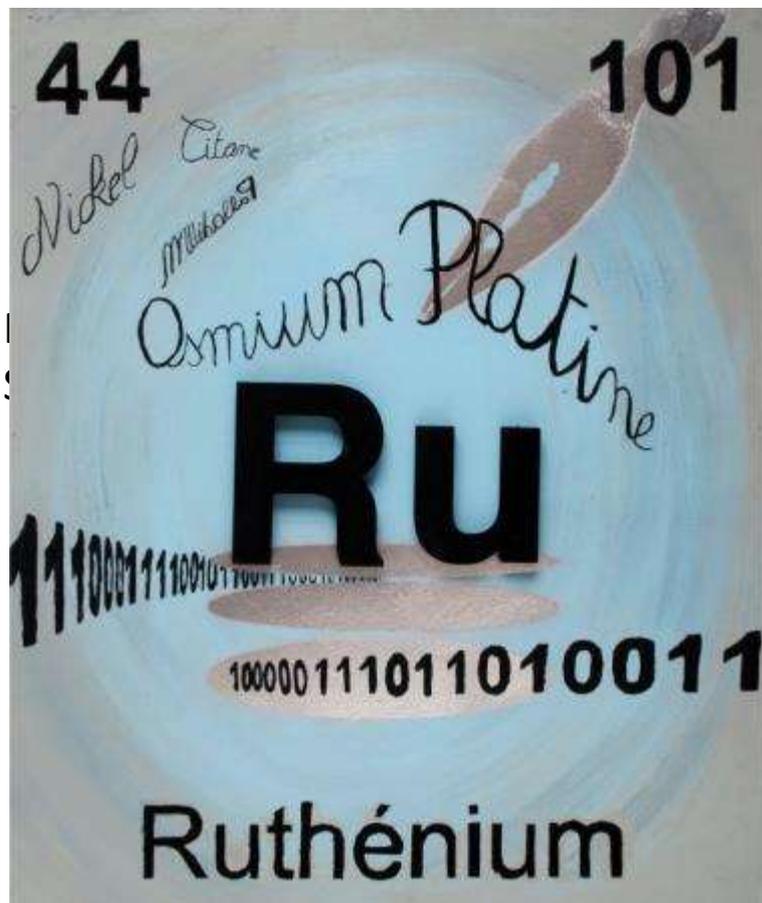

le radeau

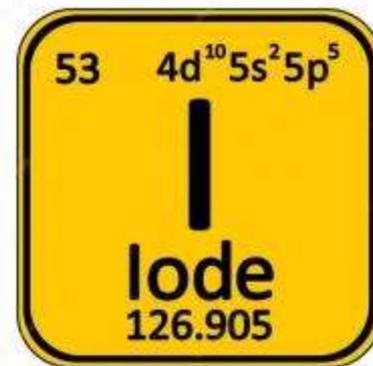

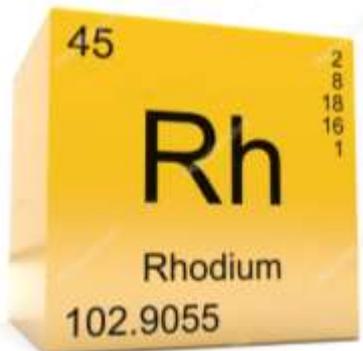

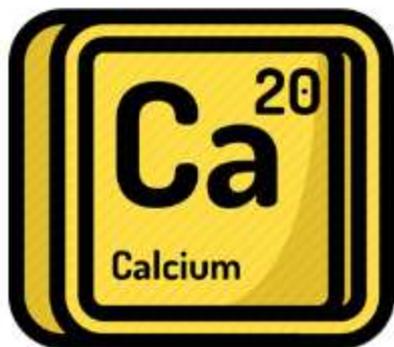

de la reine qui règne sur Rhodes

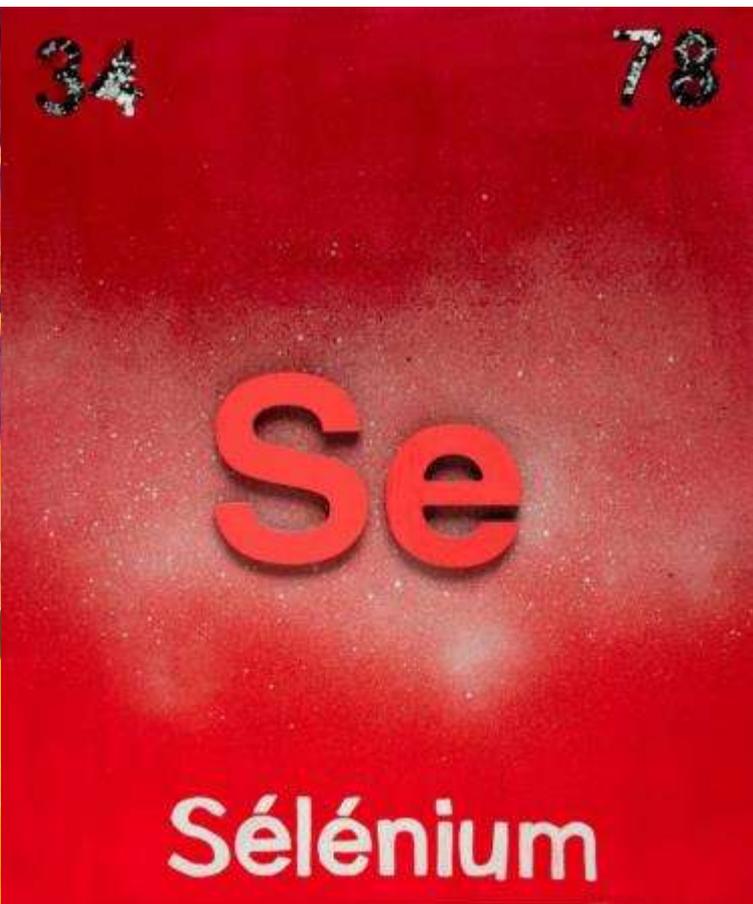

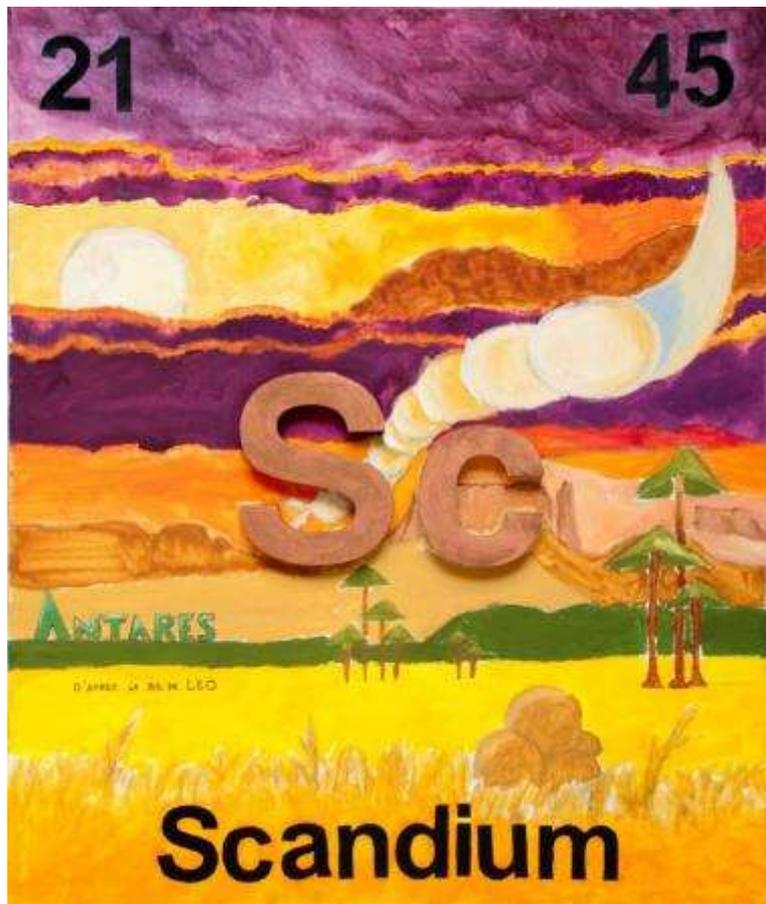

et ses rubis

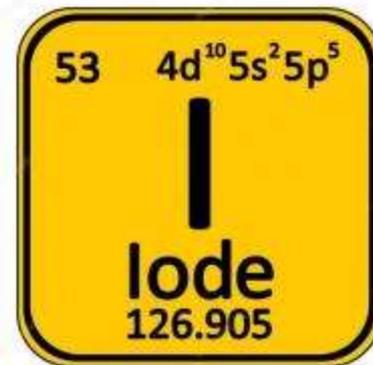

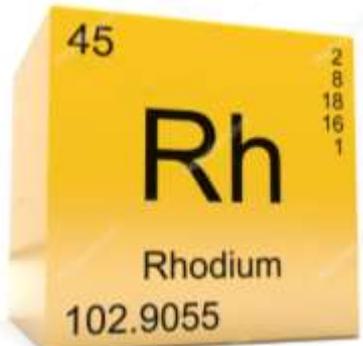

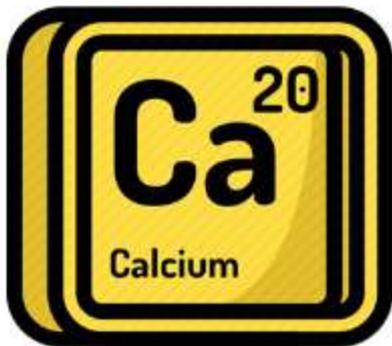

La rue en rut rêv' de références SM, même les bons samaritains

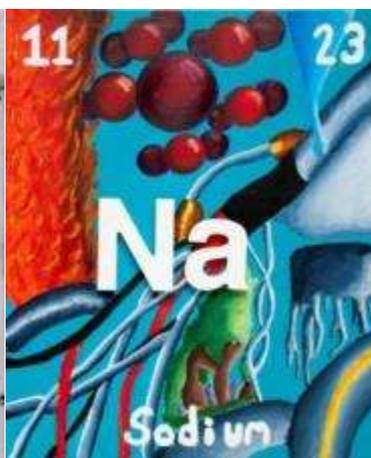

Quel scandale ! Est-ce général ? C'est énorme ...

S'il glisse

sur le seuil d'eau,

serre-le,

et s'il souffre

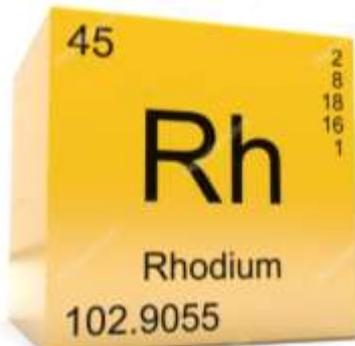

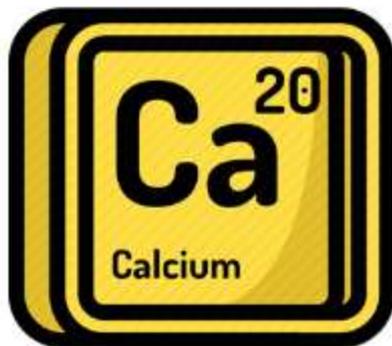

tente-la

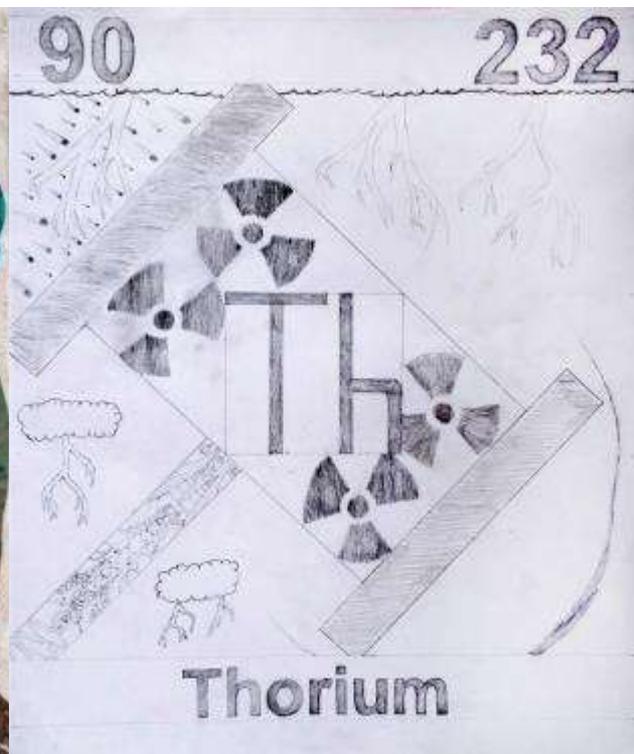

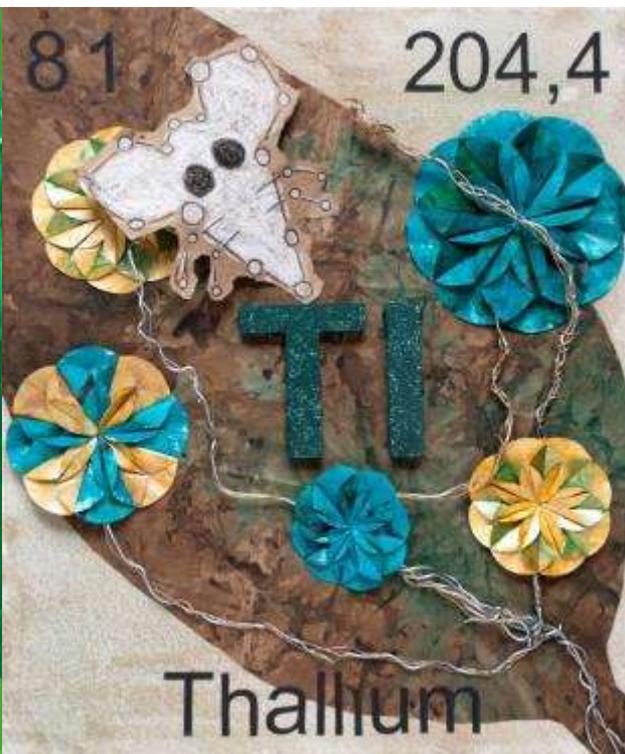

ta technique

à toute allure

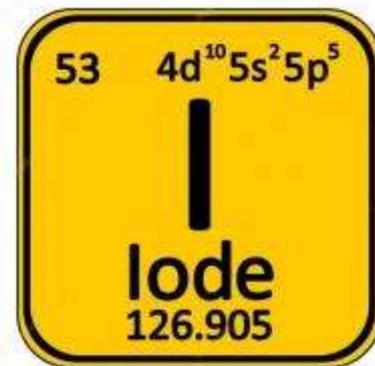

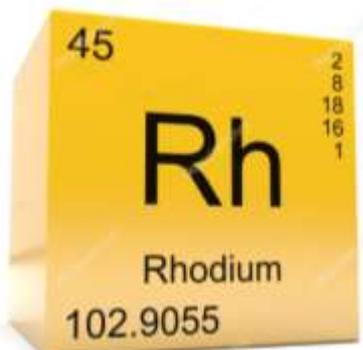

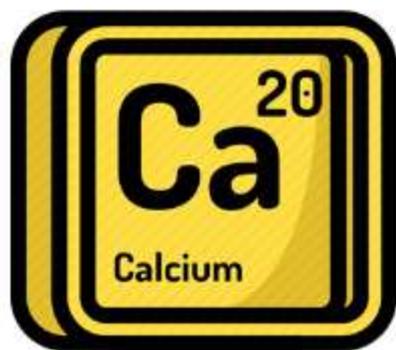

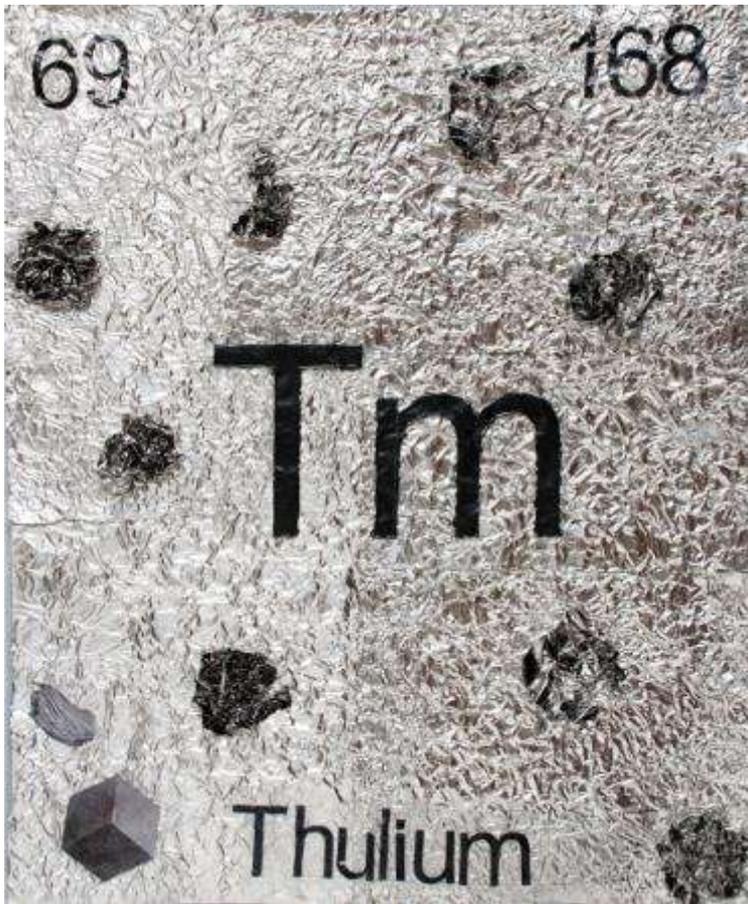

Mais t'es teubé ?!

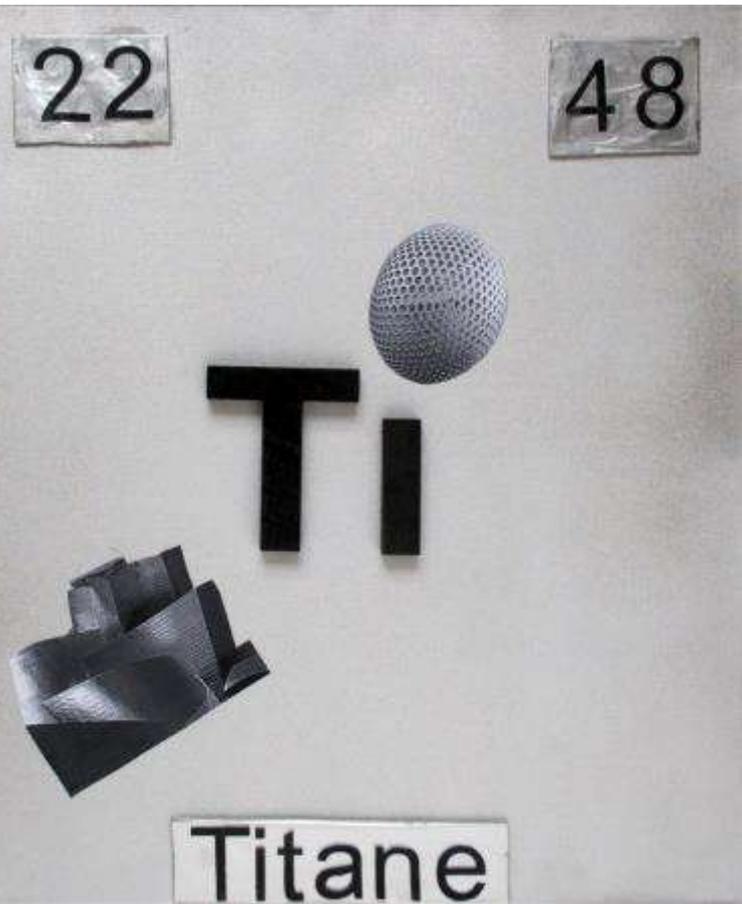

détale,

tu fais tache !

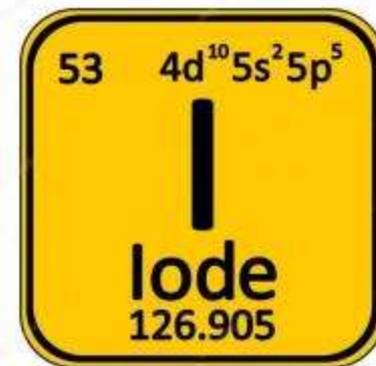

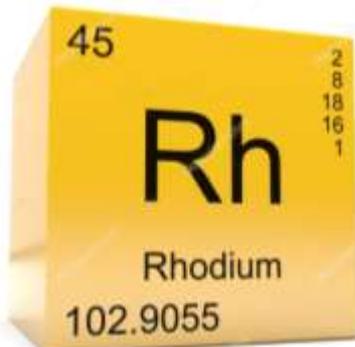

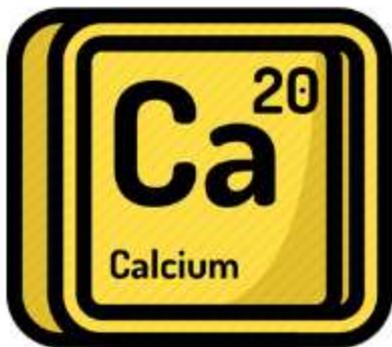

Pfff... tu tues l'homme qui t'aime,

p'tit âne

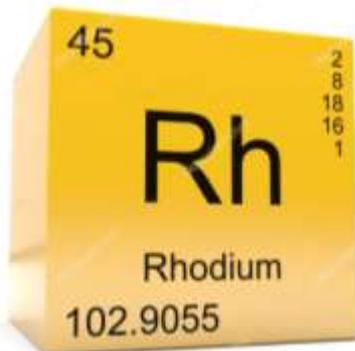

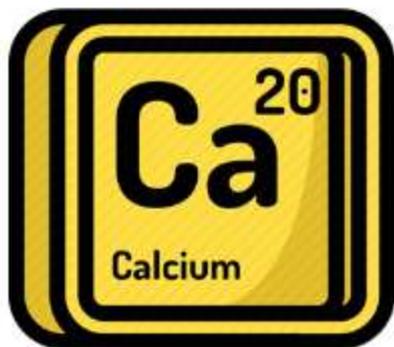

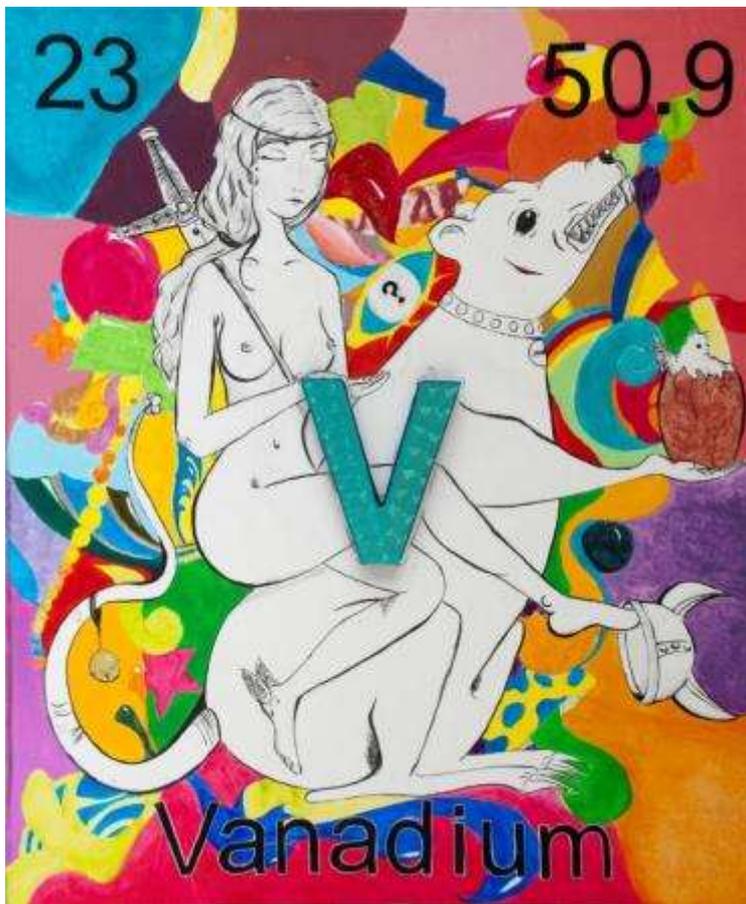

Double vie !!!

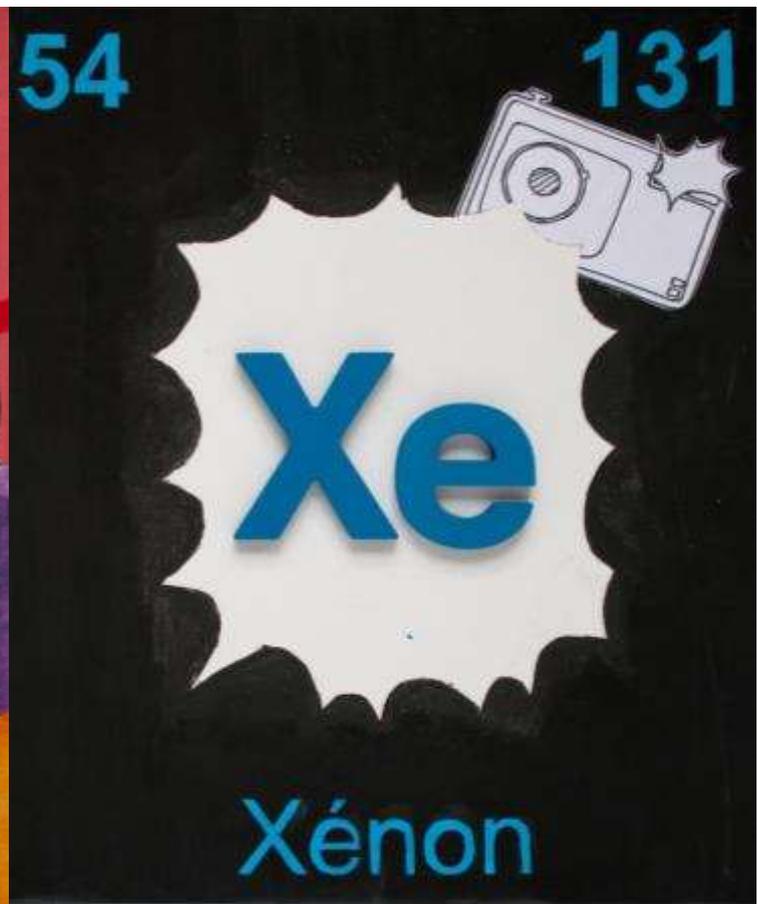

Hourra ! Tu l'as eu !

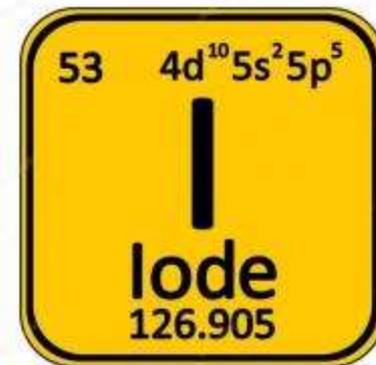

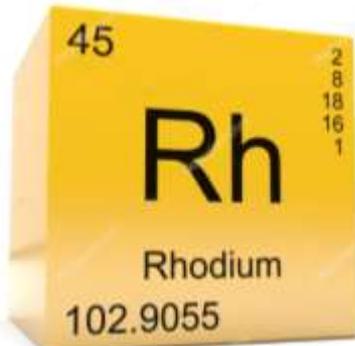

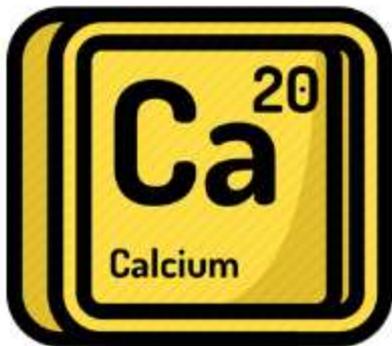

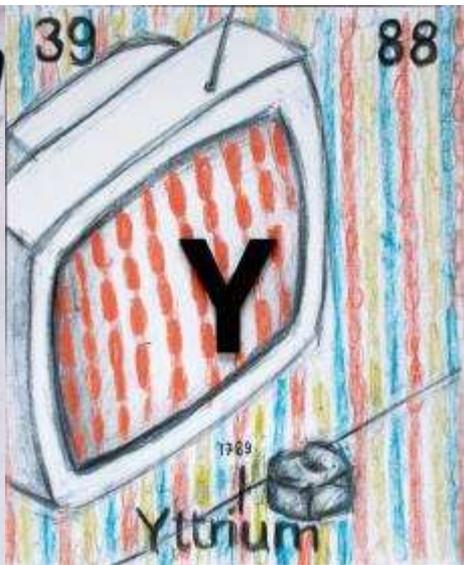

Nadia s'en va,

c'est non !

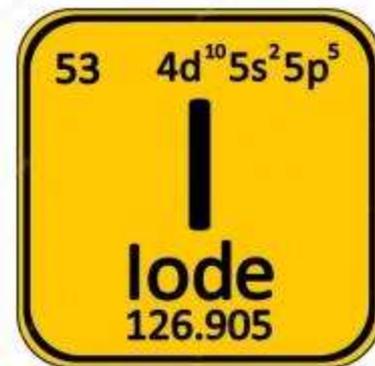

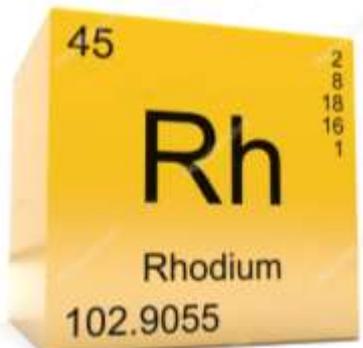

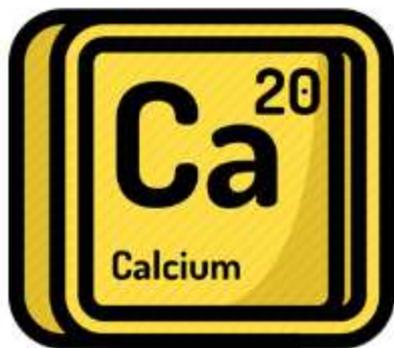

Le grec est bé,

il craque dans l'atrium,

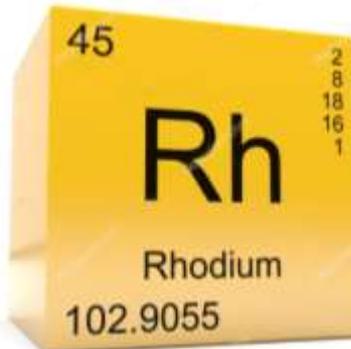

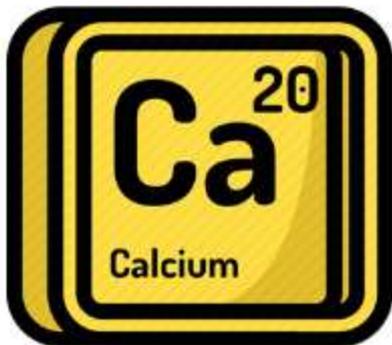

accoué au zinc,
il n'est plus très zen !

Quel cirque
fait l'homme !

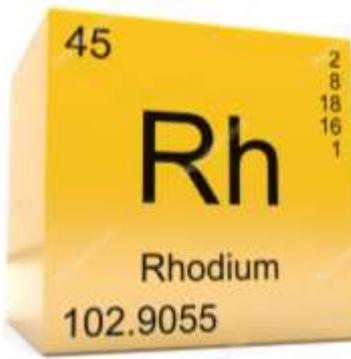

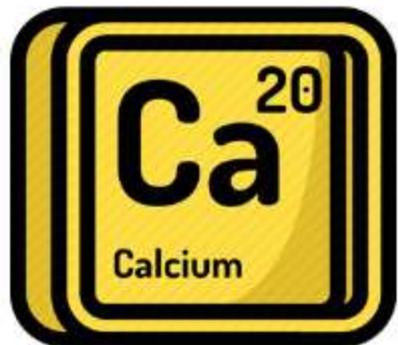

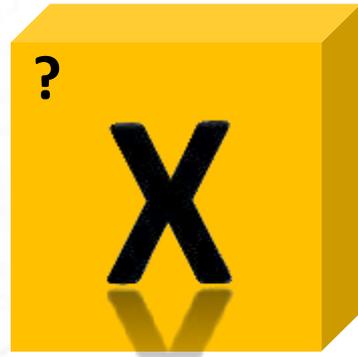

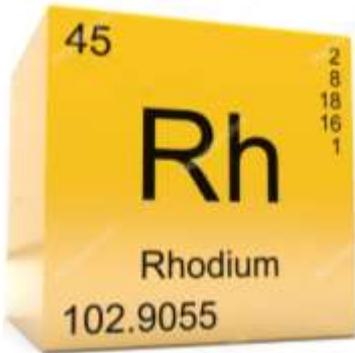

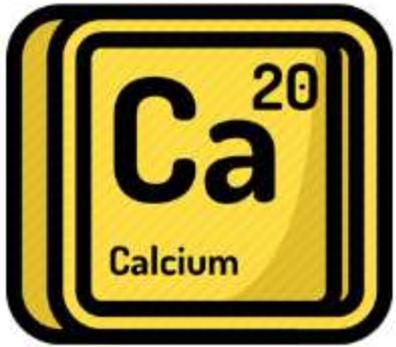

S'il n'y avait qu'une chose à retenir de tout ceci, je dirais une chose élémentaire :
c'est que les éléments ne manquent pas d'air ...

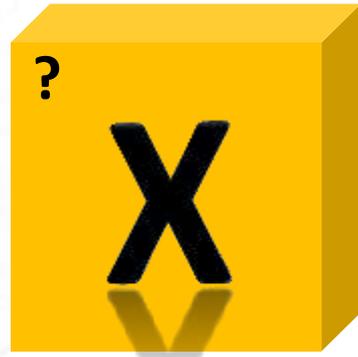

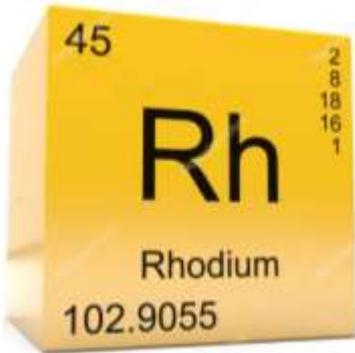

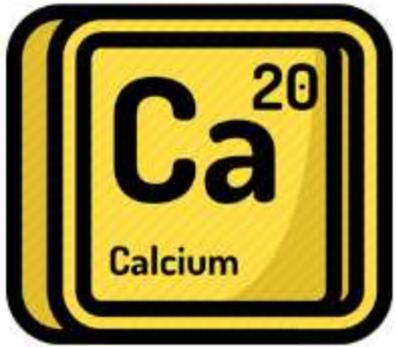

Moralité : l'inconnu n'est qu'une chimère pour celui qui ne cherche pas,

Chimie & Terroir 2019

mais sachez que tôt ou tard la chimie nous caresse jusque dans nos produits du terroir.

Chimie & Terroir 2019
